Présentation Bétotitan XL[®]

Caractéristiques du bloc

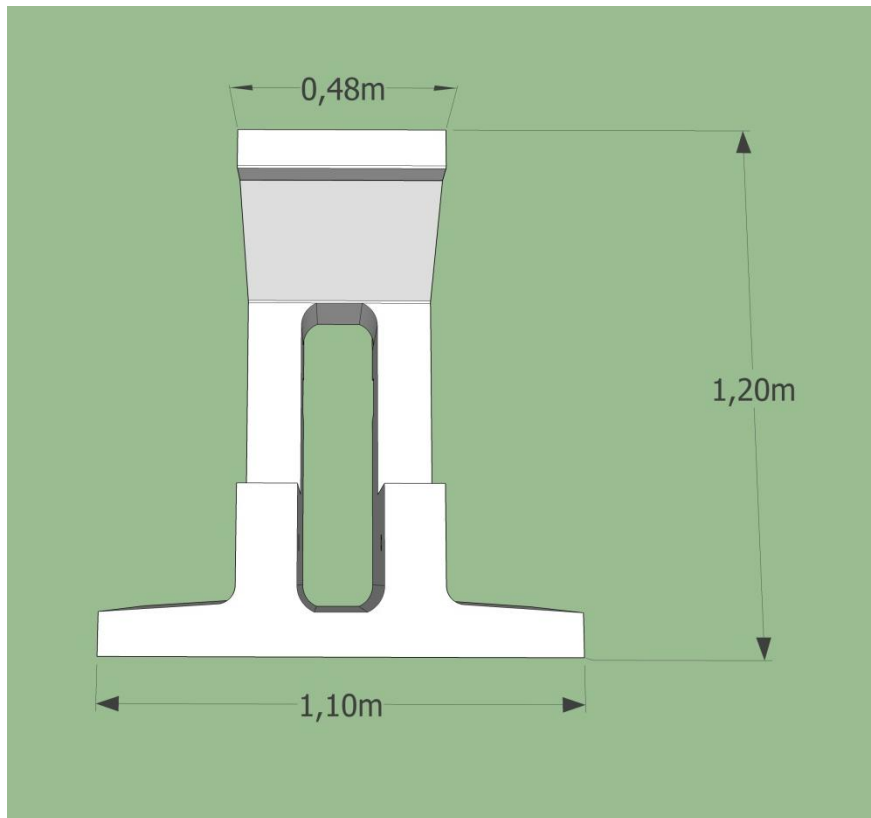

Mesures:

- Hauteur face avant: 0,8 m
- Hauteur face arrière: 0,9 m

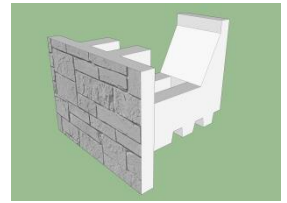

Caractéristiques du bloc

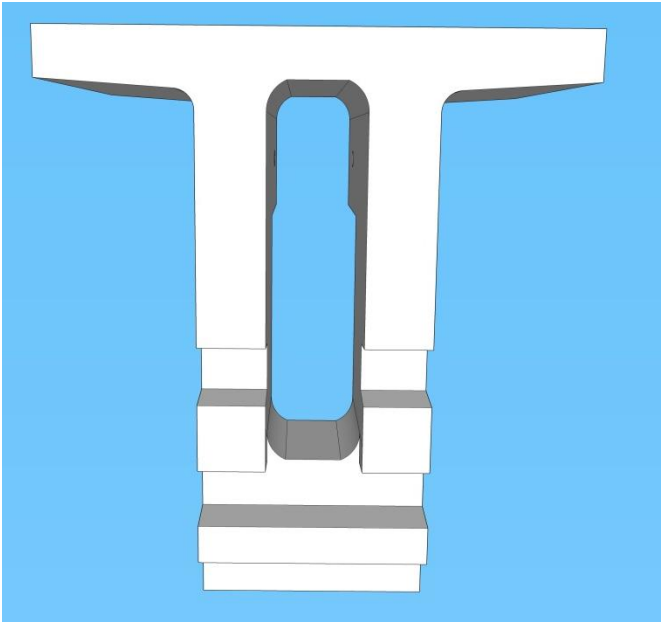

Mesures:

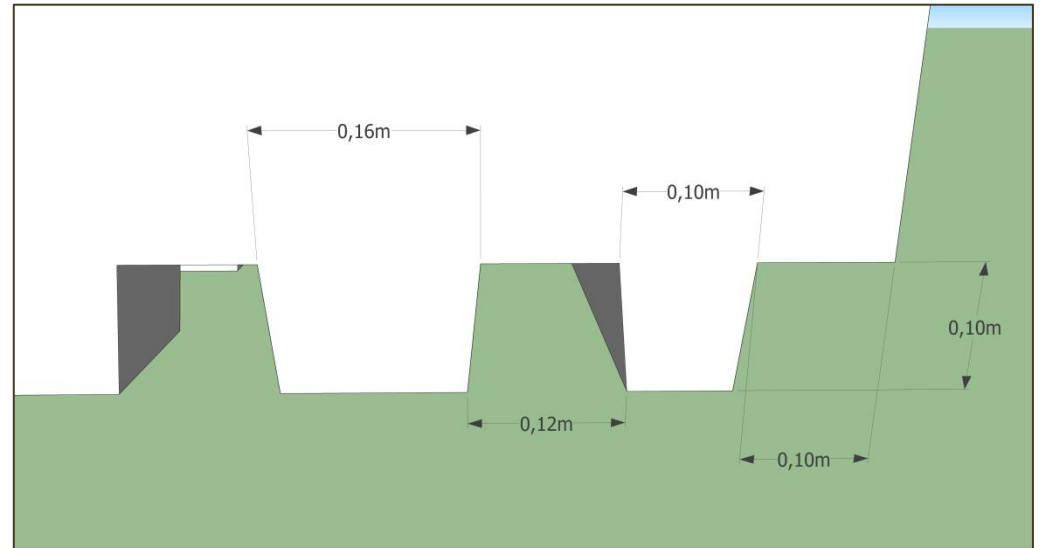

- Longueur: 1,2 m
- Largeur face avant: 1,1 m
- largeur face arrière: 0,48 m

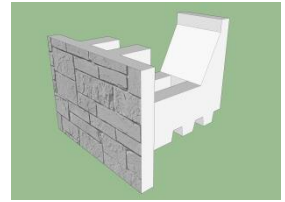

Caractéristiques du bloc

Cotations des crans

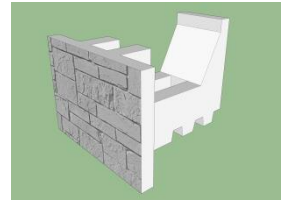

Caractéristiques du bloc

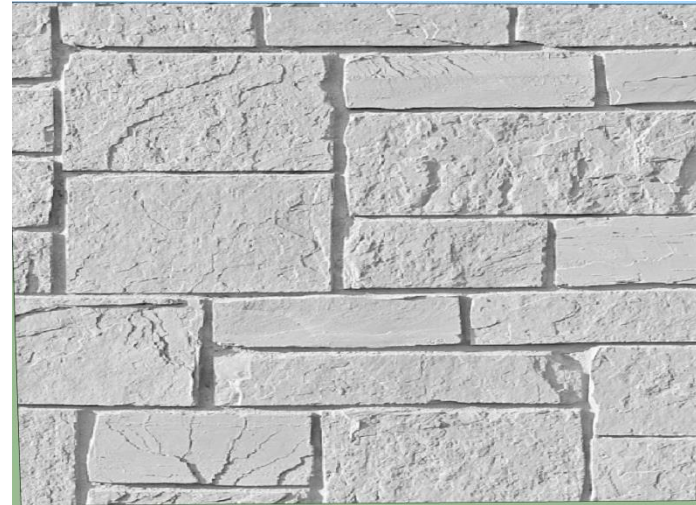

Volume: 0,3 m³

Masse: 700 kg

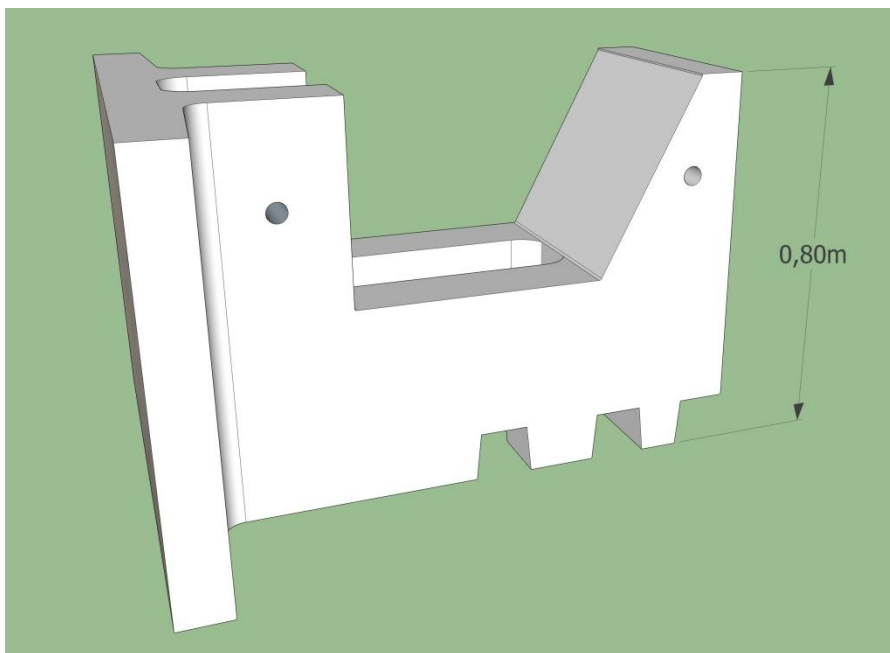

Caractéristiques du bloc

22 types de matriçages standards avec également
Des possibilités de matriçages personnalisés

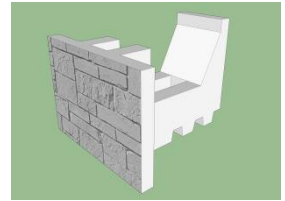

Caractéristiques du bloc

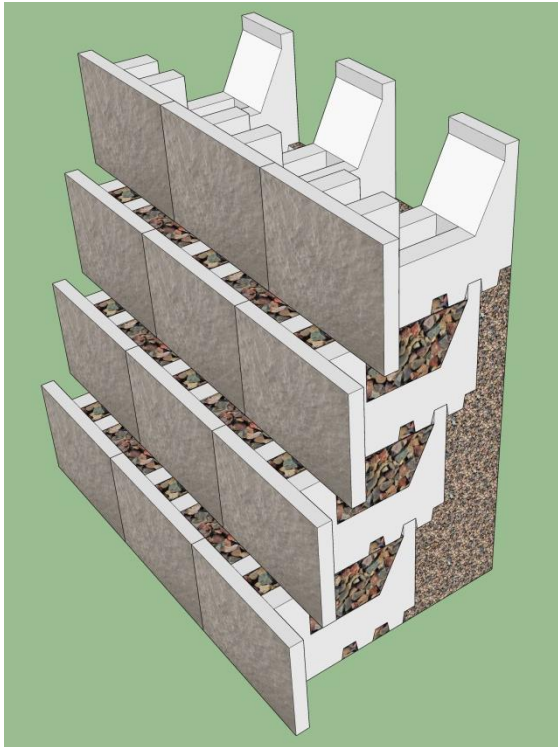

Existence d'un bloc différent avec une réduction de la hauteur sur la face arrière pour permettre:

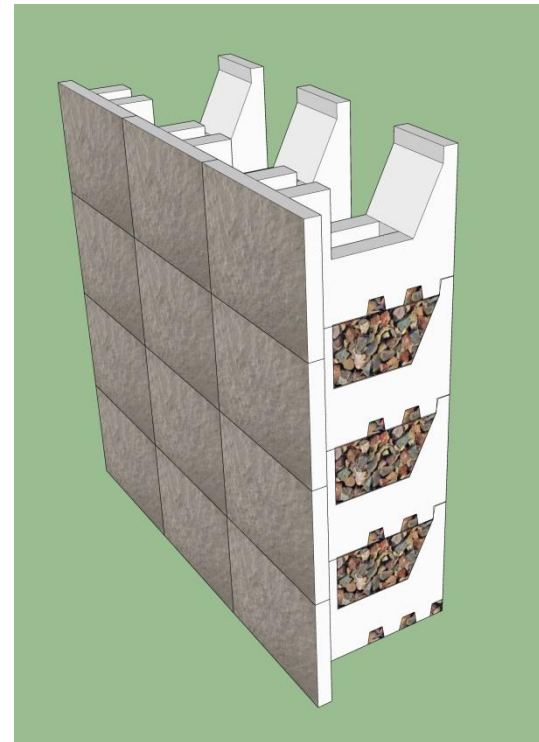

- Des assemblages complexes (arrondies, angle obtus ou aigus et angle droit)
- Un meilleur rendu au niveau du dernier rang (facilite la finition avec une dalle en béton par exemple)

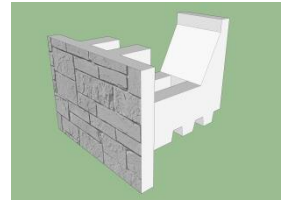

Assemblage

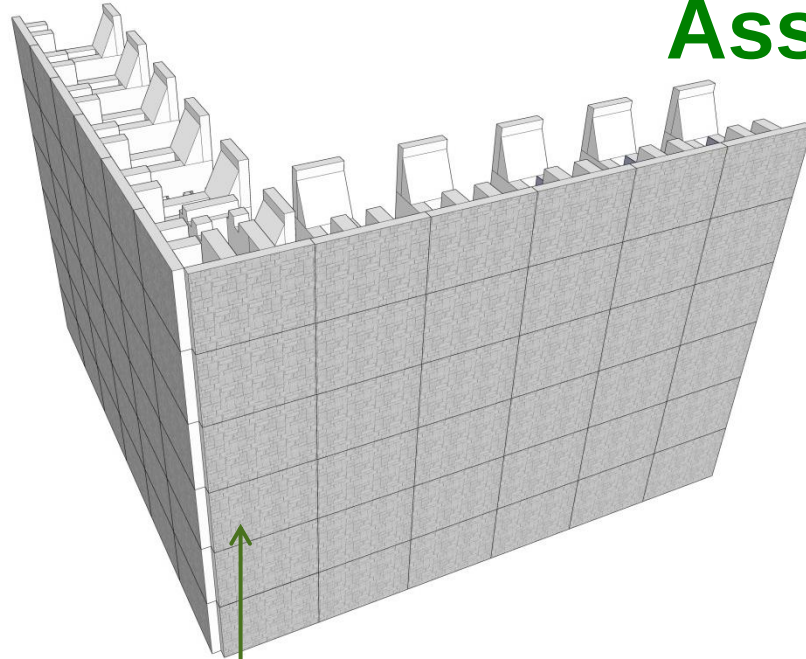

Mur avec un fruit

Mur vertical

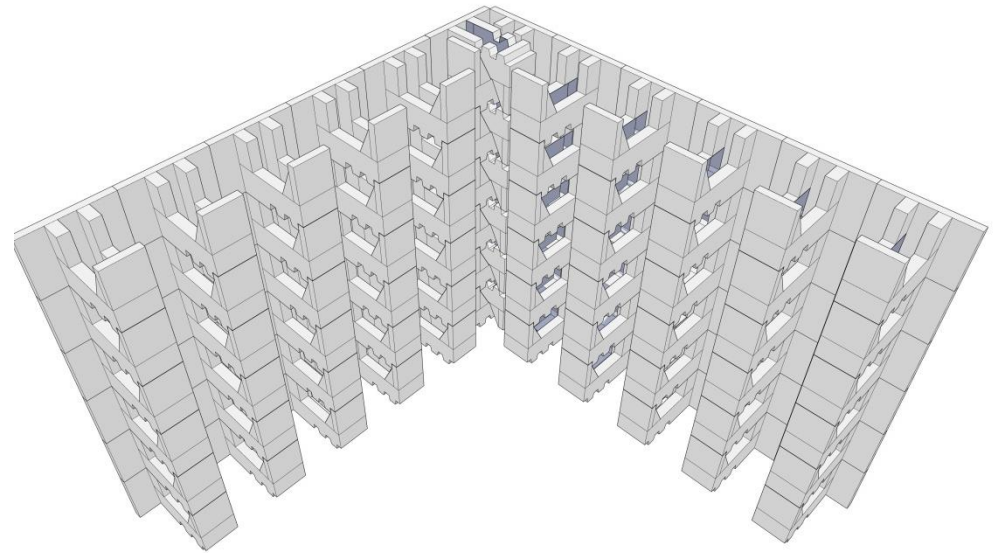

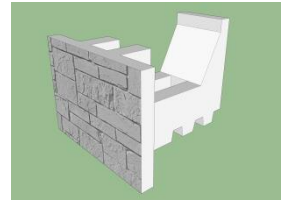

Assemblage

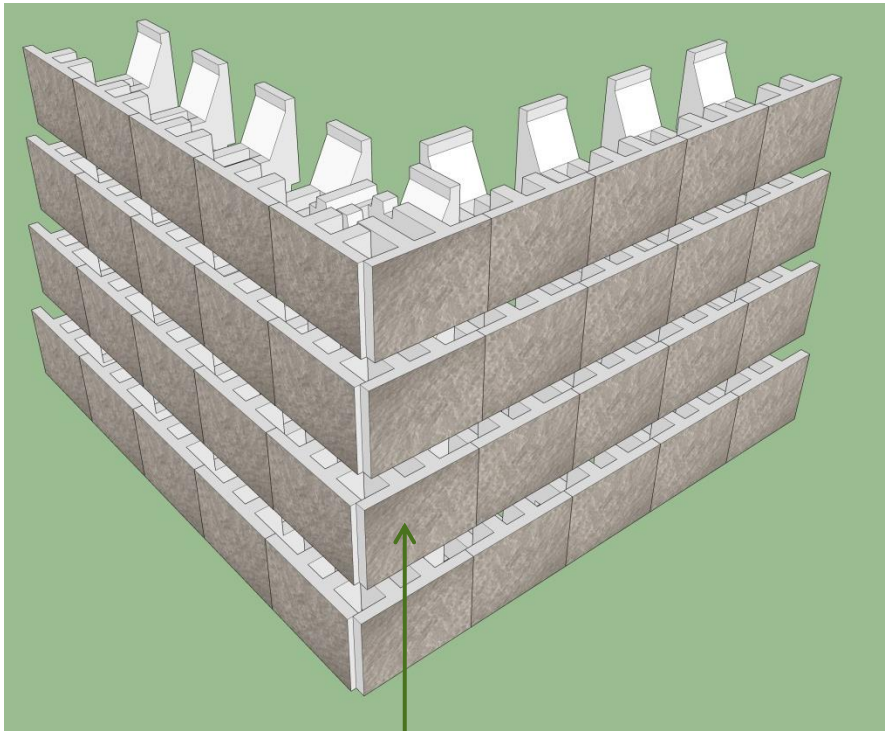

Bloc avec la hauteur arrière réduite

Mur avec un angle droit

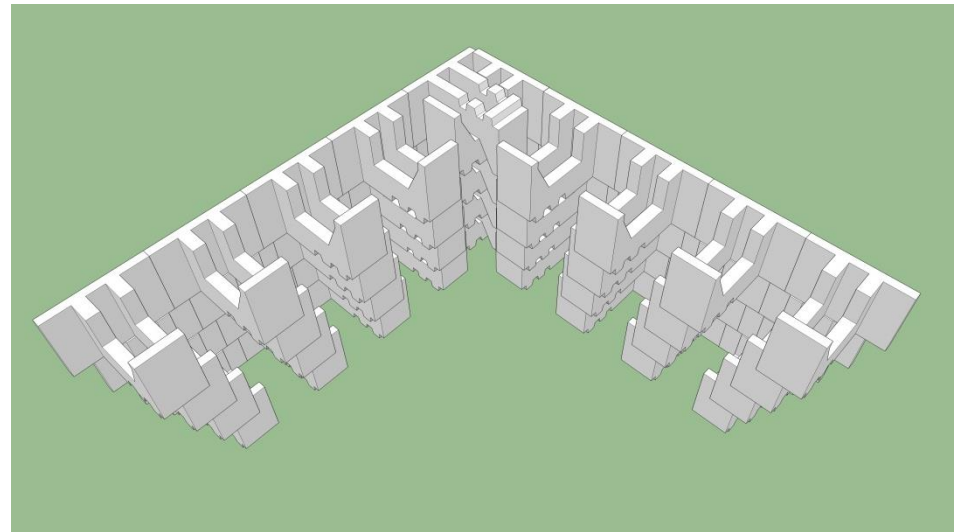

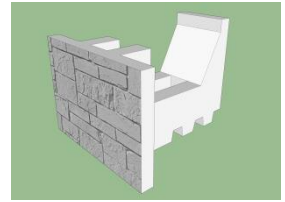

Assemblage

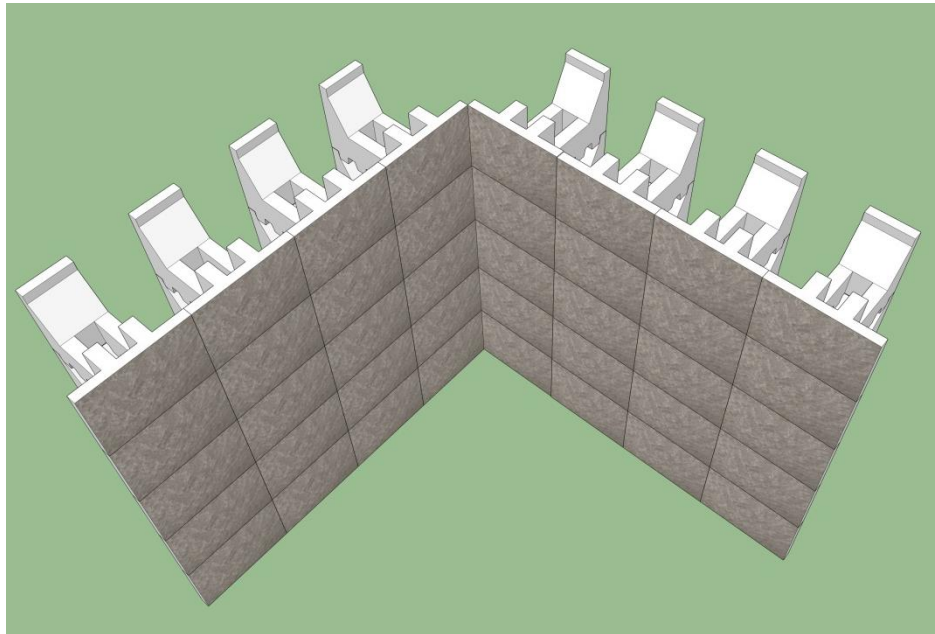

Un angle droit avec fruit

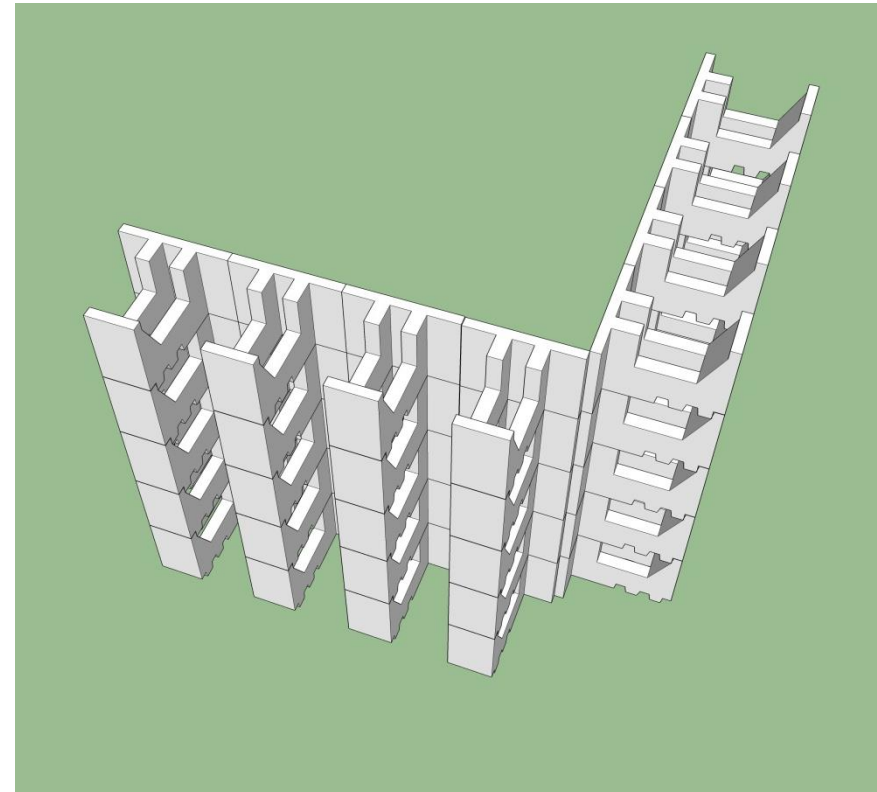

Bloc avec la hauteur arrière réduite

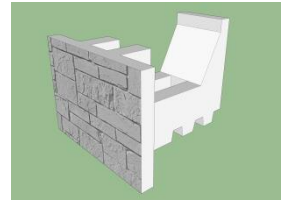

Assemblage

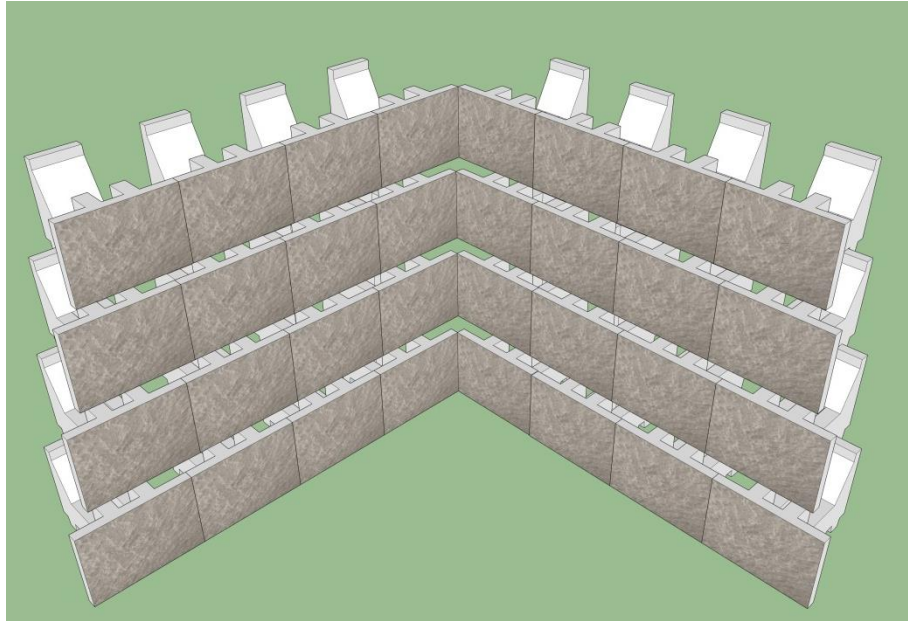

Mur avec angle droit intérieur

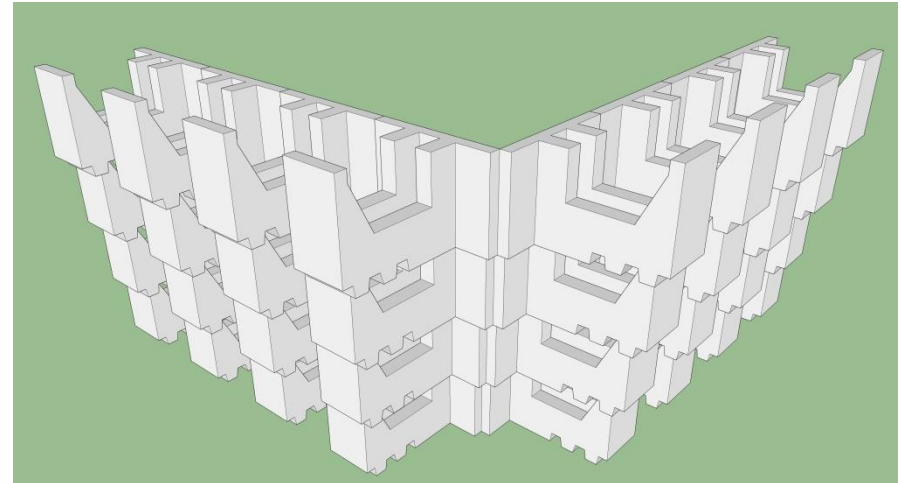

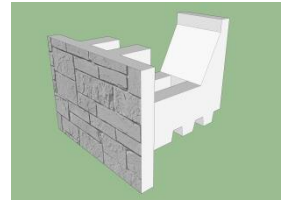

Assemblage

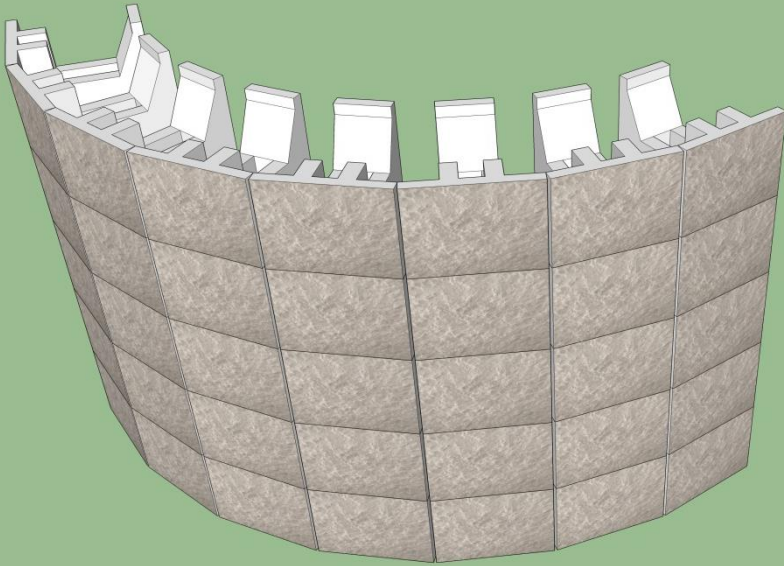

Angle droit intérieur avec fruit

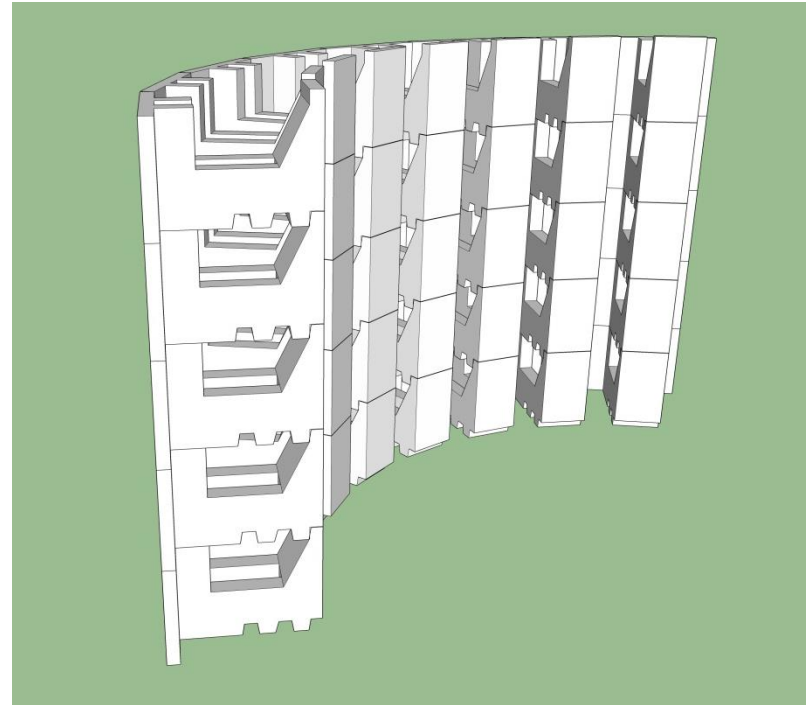

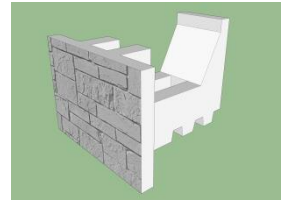

Assemblage

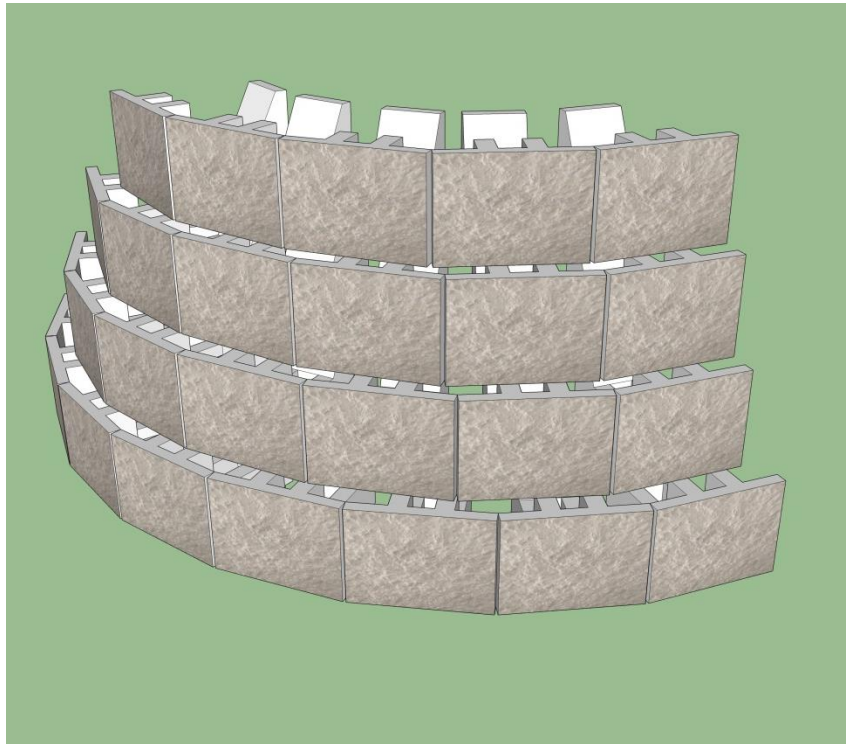

Surface convexe

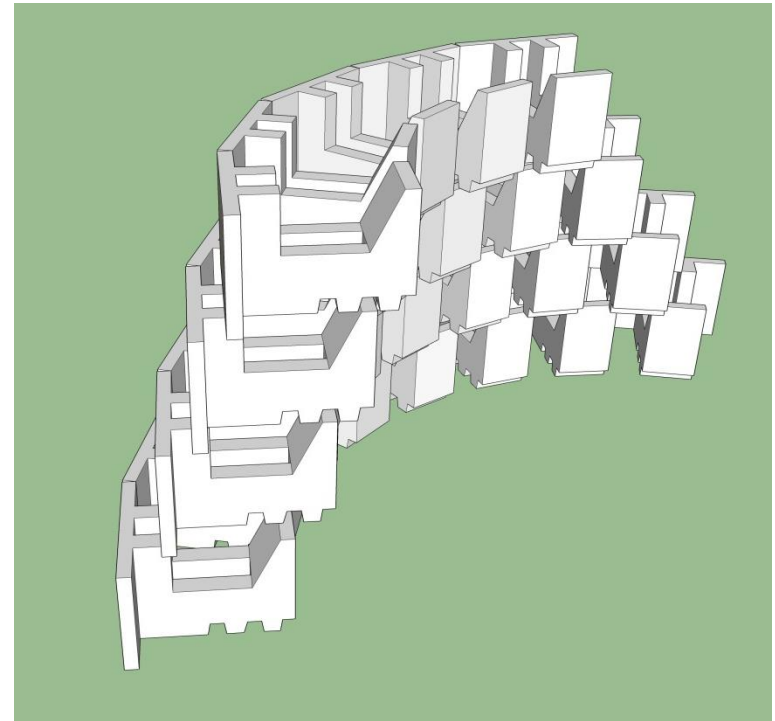

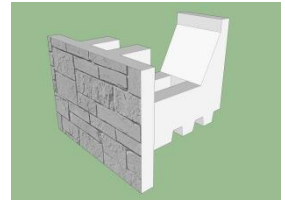

Assemblage

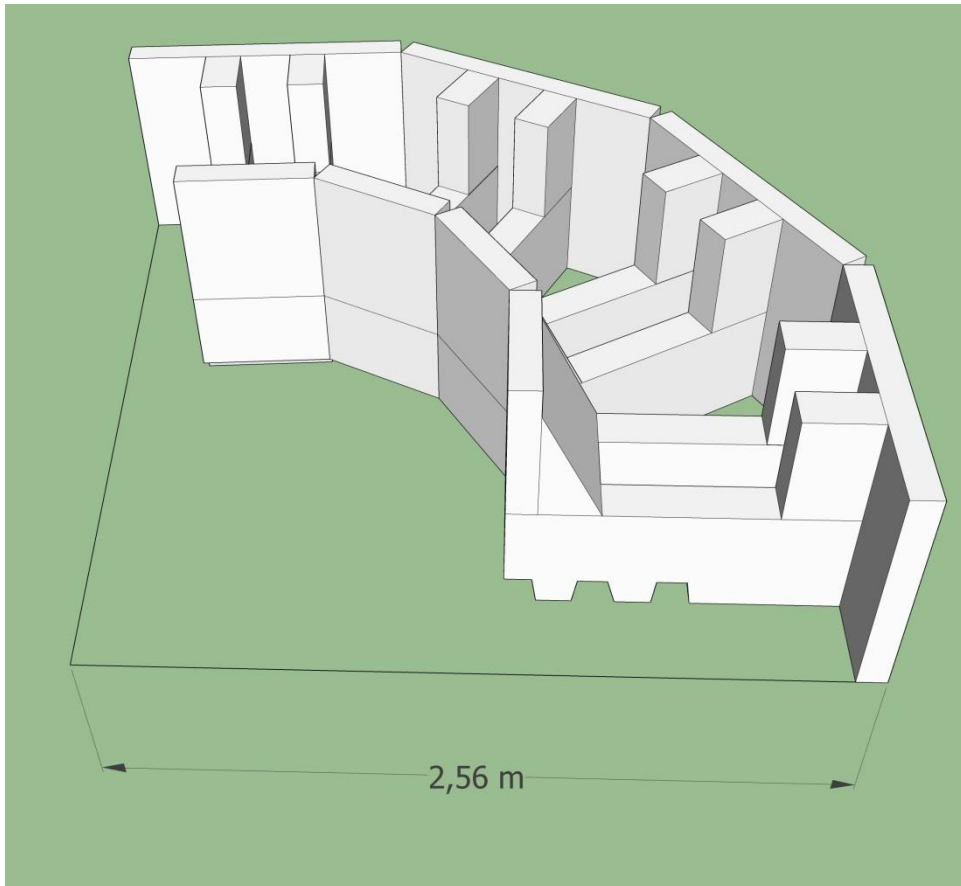

Surface convexe avec fruit

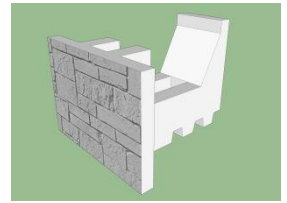

Tous les blocs possèdent la hauteur arrière réduite

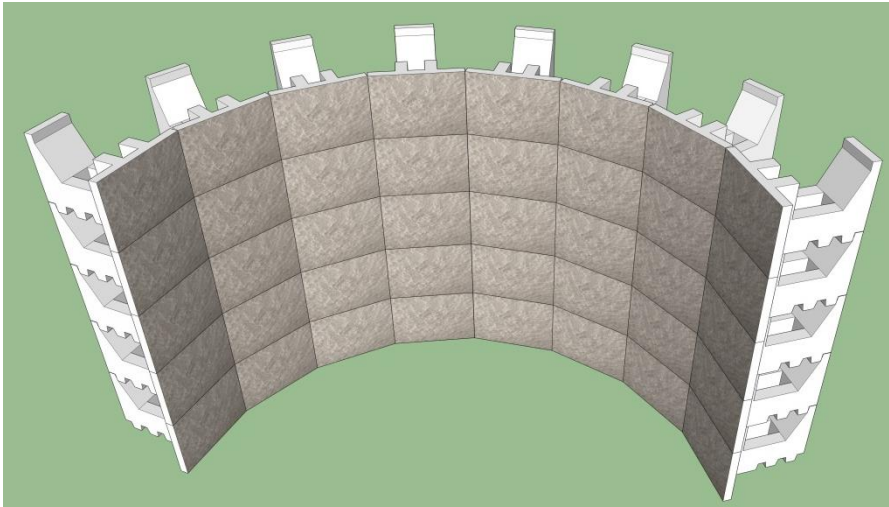

Assemblage

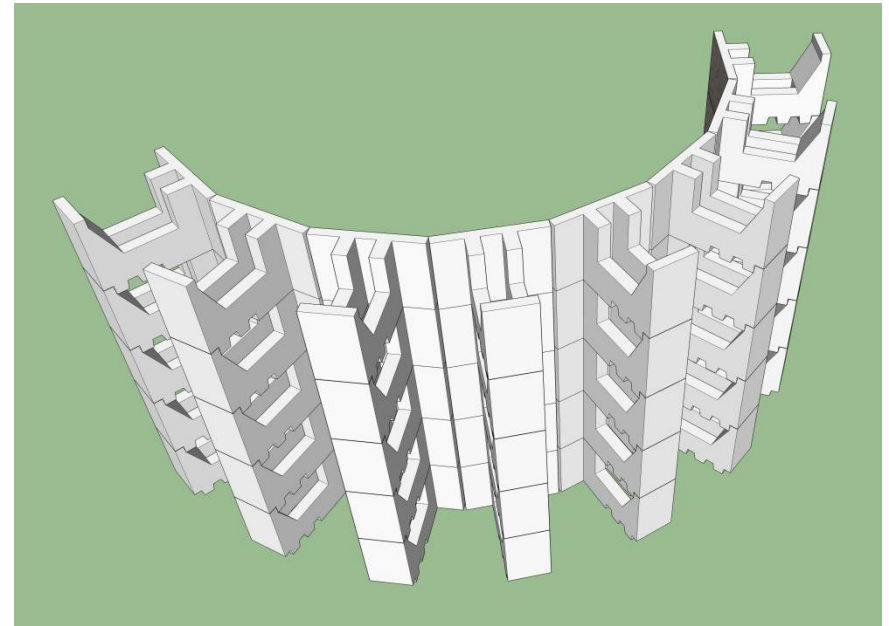

Rayon minimal pour tourner à 90°
en surface convexe (4 blocs)

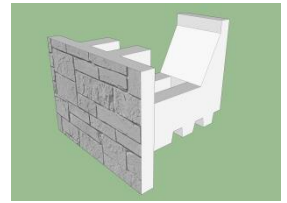

Assemblage

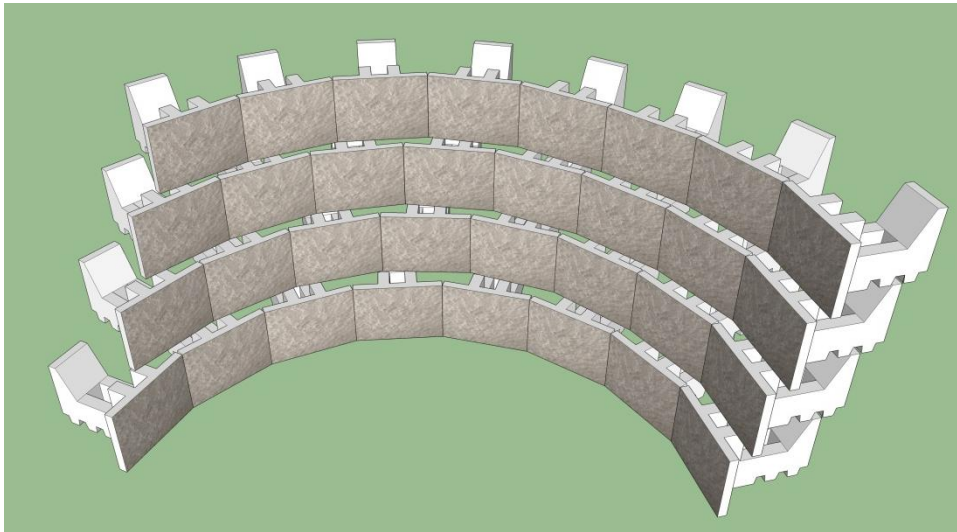

Surface concave

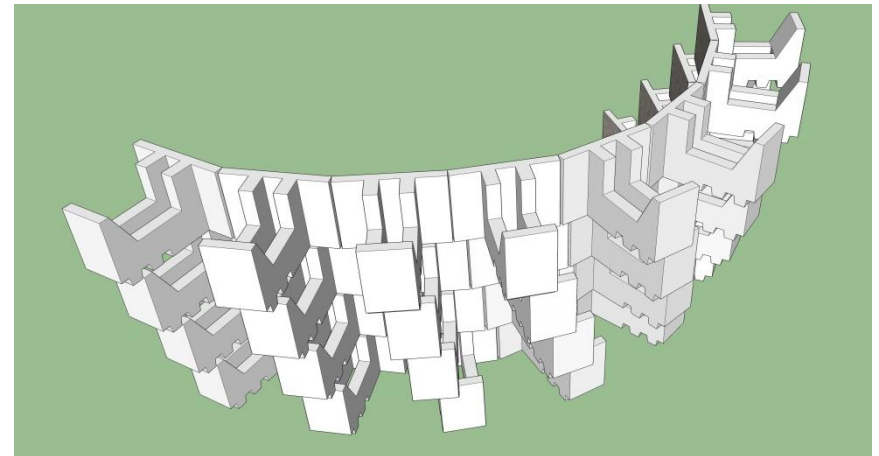

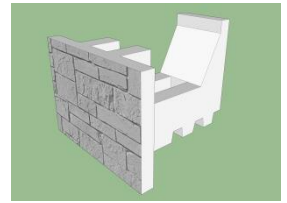

Assemblage

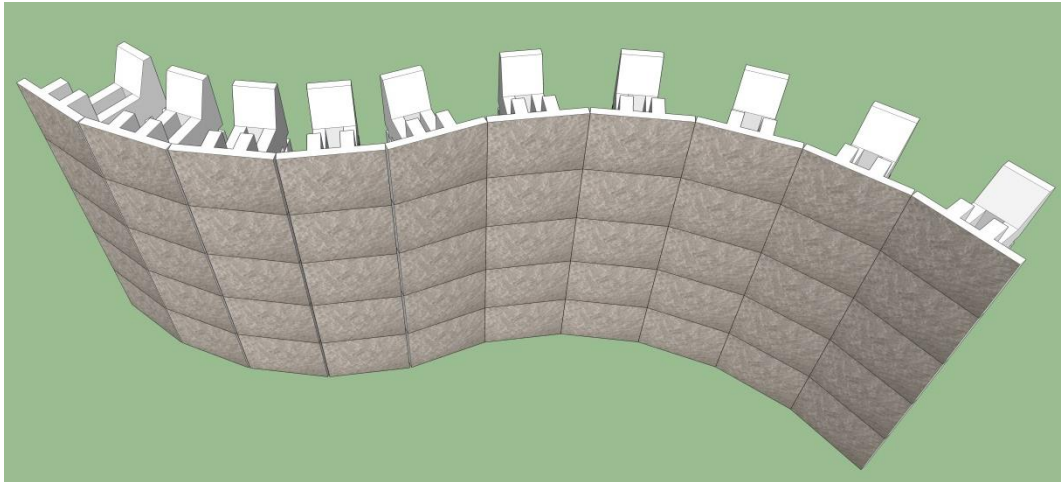

Surface concave avec fruit

Tous les blocs possèdent la hauteur arrière réduite

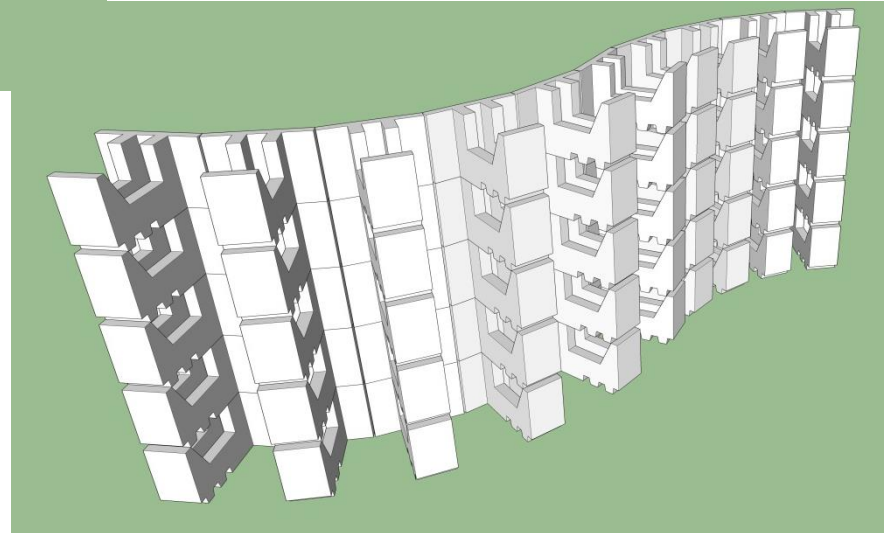

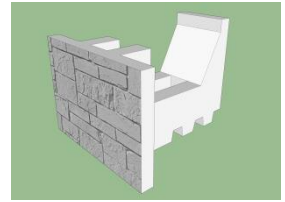

Assemblage

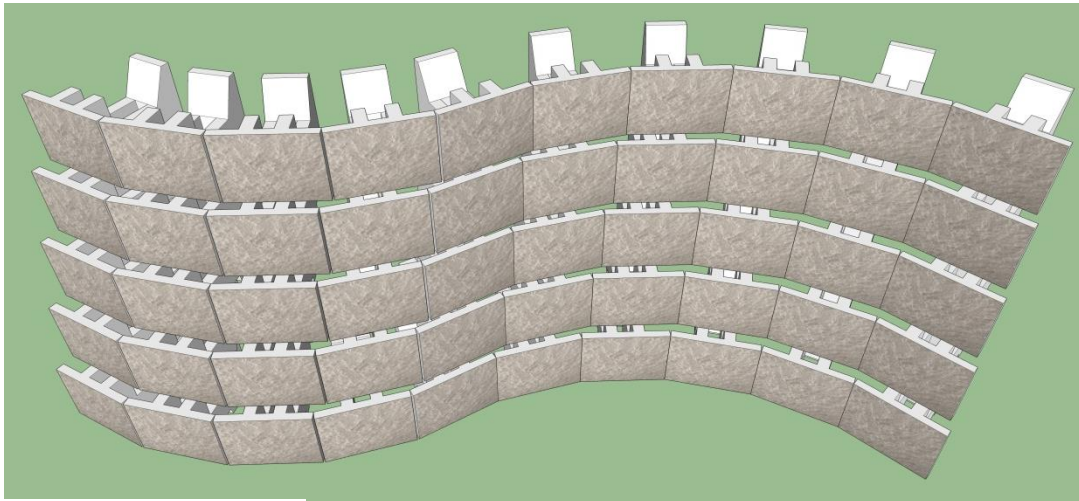

Surface concave et convexe

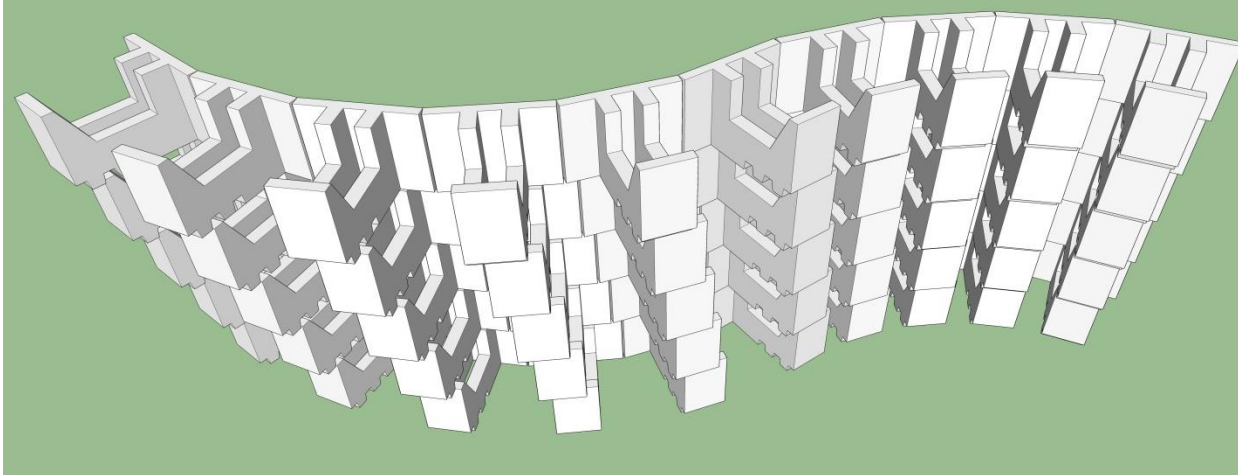

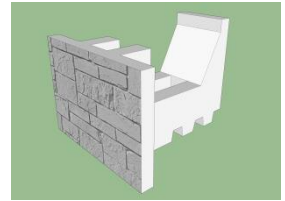

Assemblage

Surface concave et convexe
avec fruit

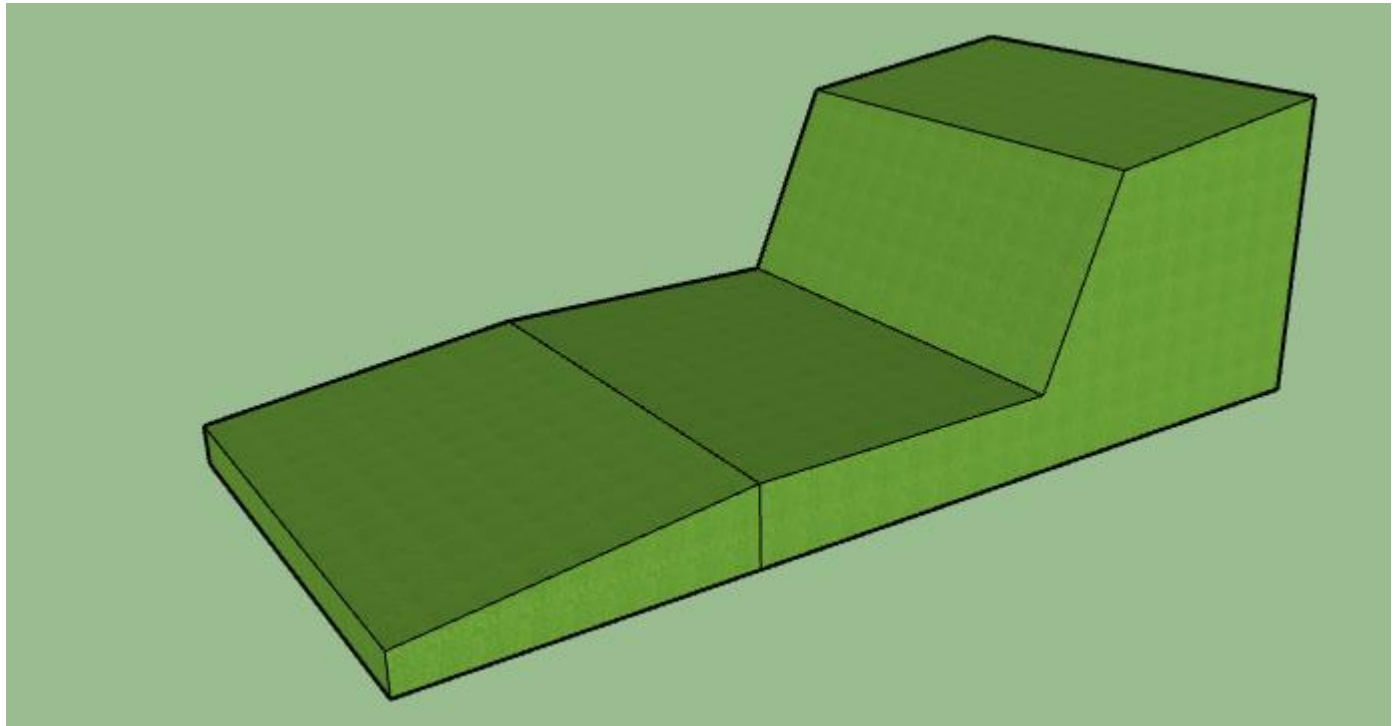

Tous les blocs possèdent la hauteur
arrière réduite

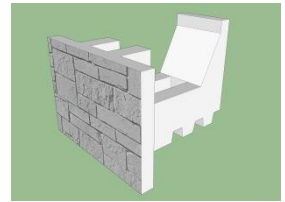

Les étapes du montage d'un mur

1) Maintien de Talus

Les étapes du montage d'un mur

1) Maintien de Talus

Etape n°1: Mise en place d'une assise

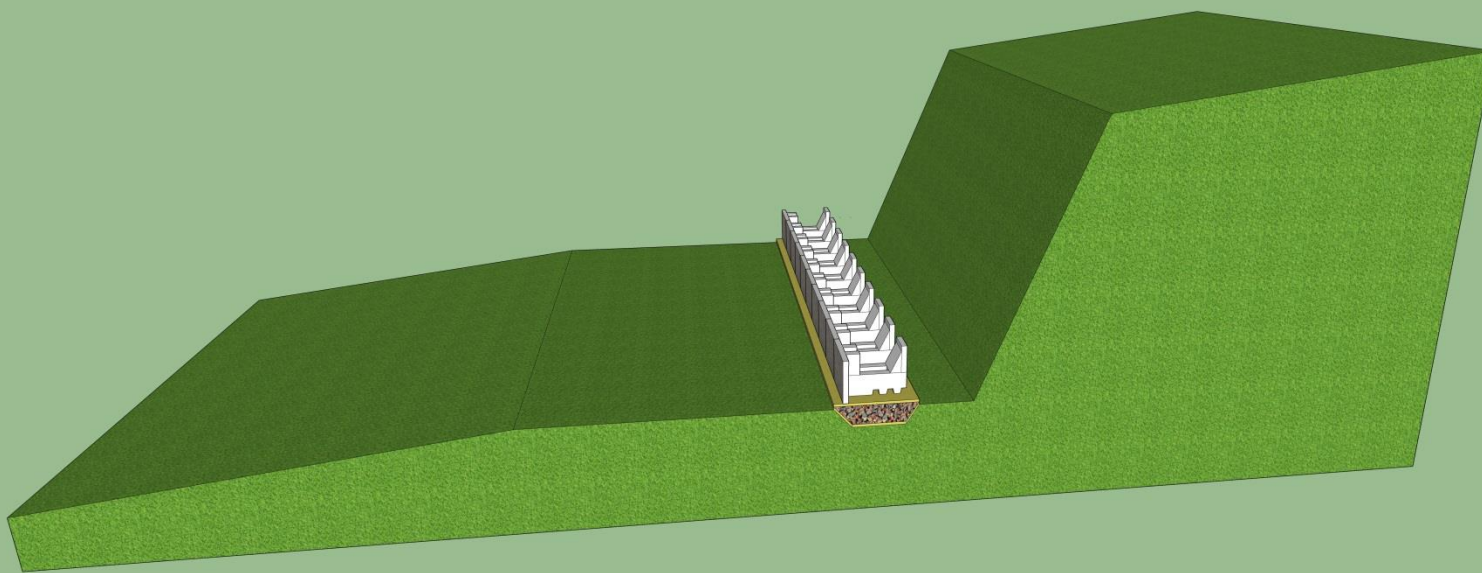

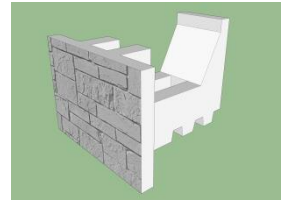

Les étapes du montage d'un mur

1) Maintien de Talus

Etape n°2: Pose du premier rang

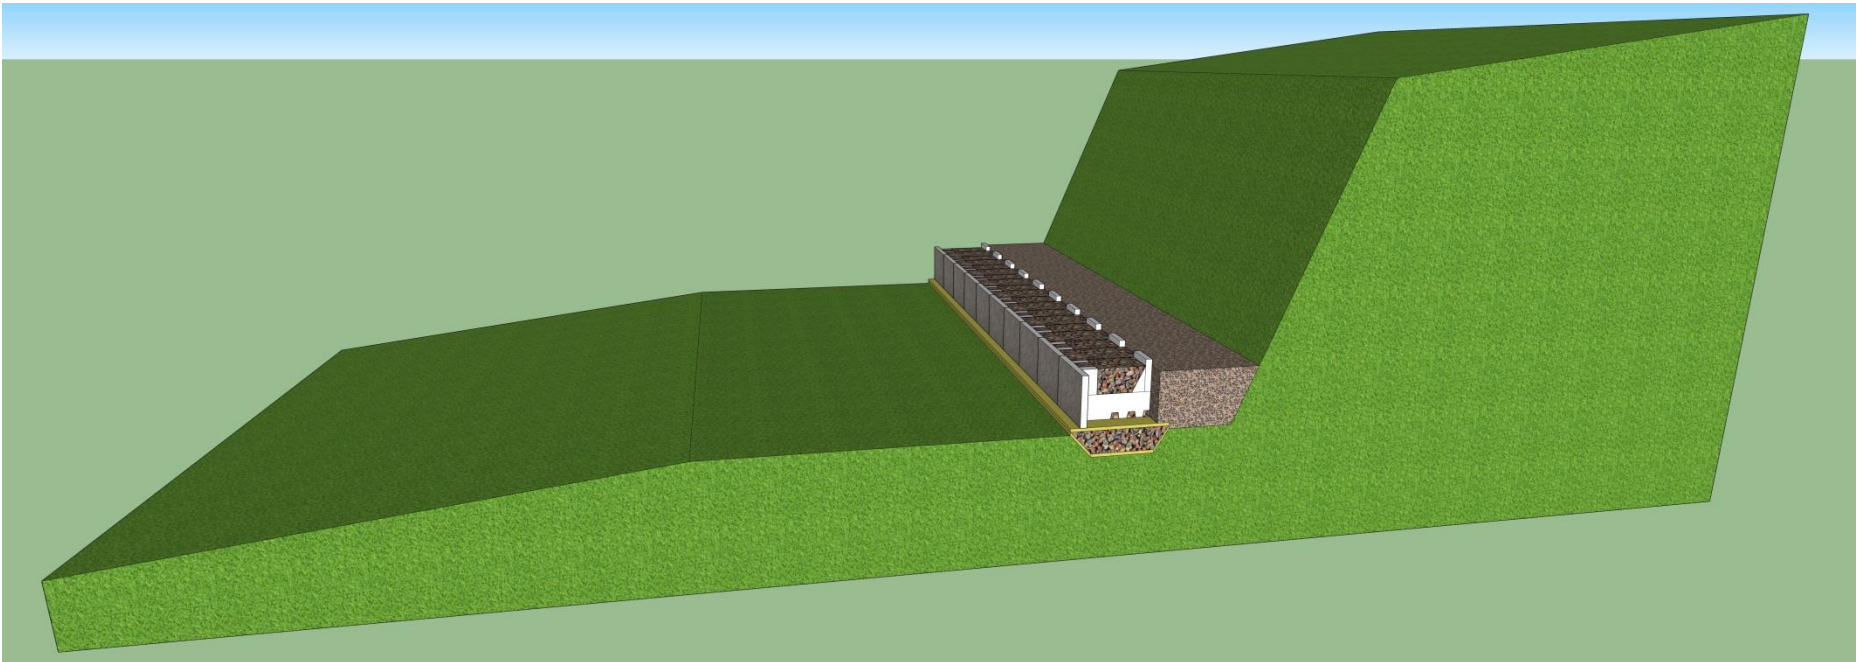

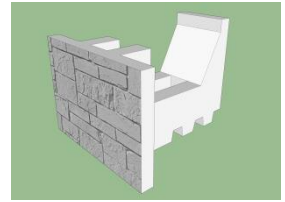

Les étapes du montage d'un mur

1) Maintien de Talus

Etape n°3: Remplissage du premier rang

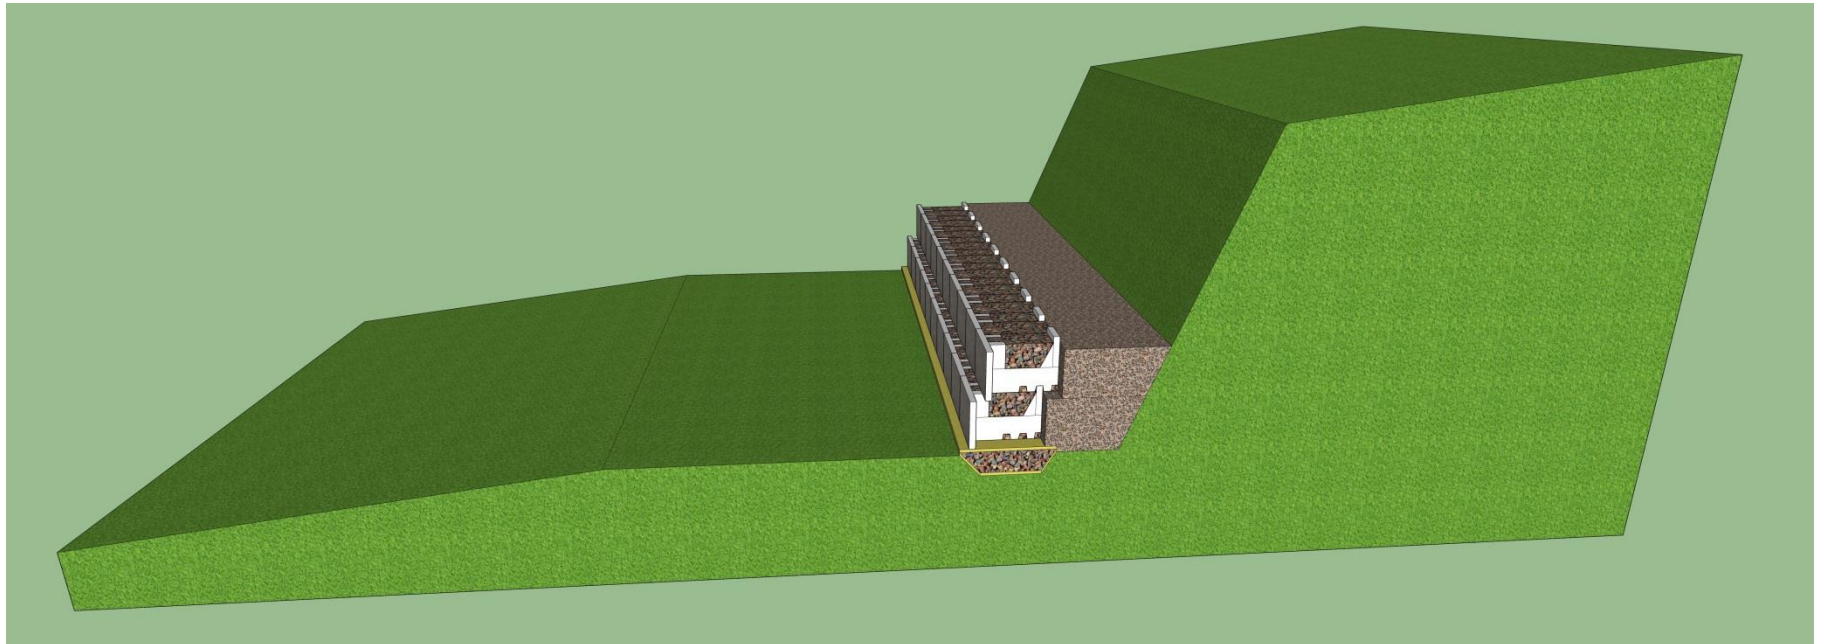

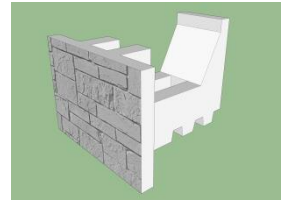

Les étapes du montage d'un mur

1) Maintien de Talus

Etape n°4: Pose et remplissage des autres rangs de la même manière

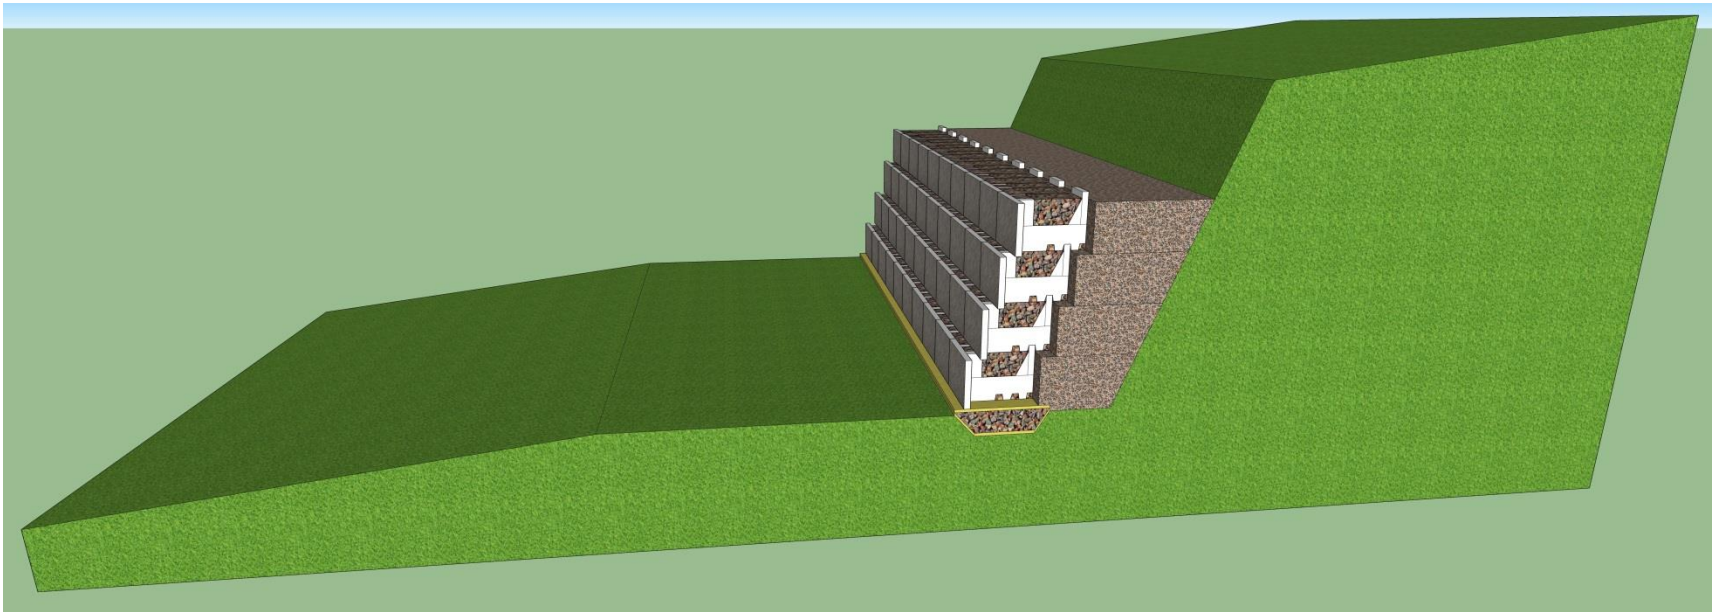

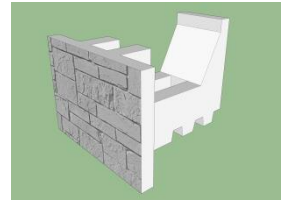

Les étapes du montage d'un mur

1) Maintien de Talus

Etape n°4: Pose et remplissage des autres rangs de la même manière

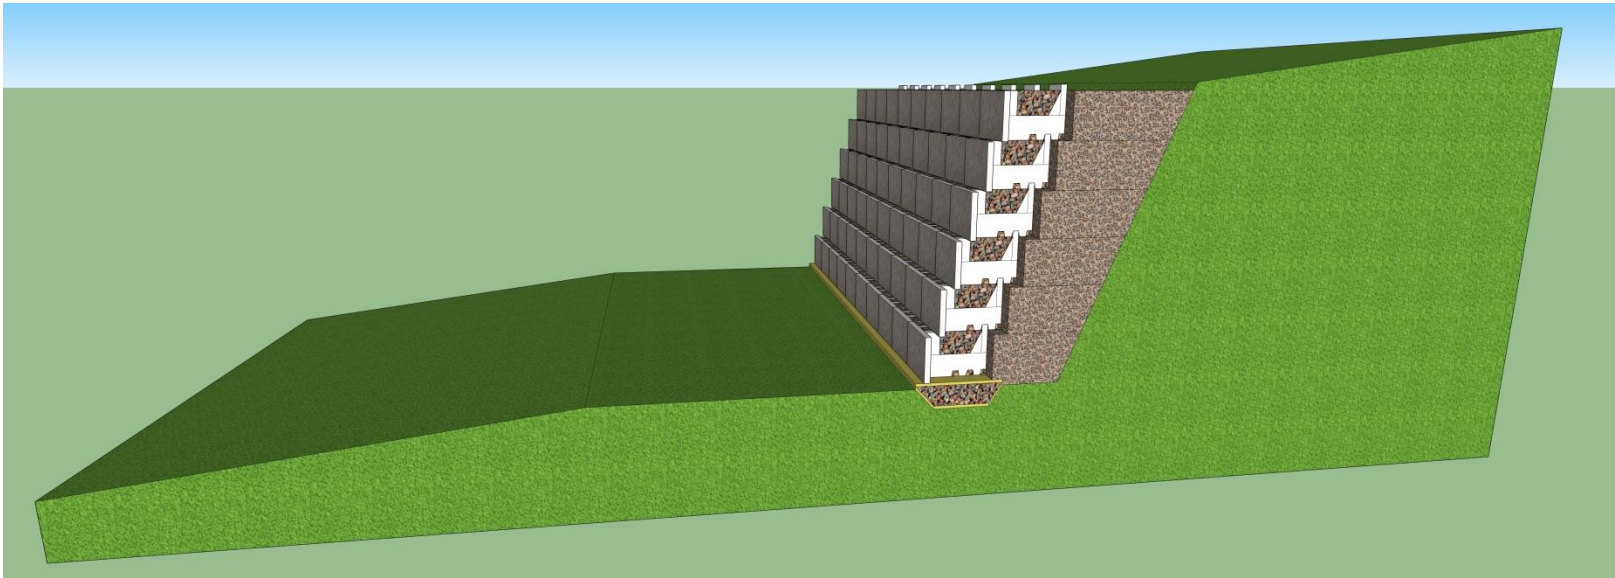

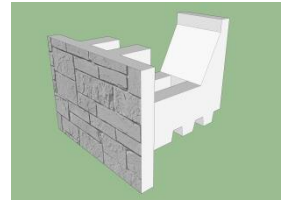

Les étapes du montage d'un mur

1) Maintien de Talus

Etape n°4: Pose et remplissage des autres rangs de la même manière

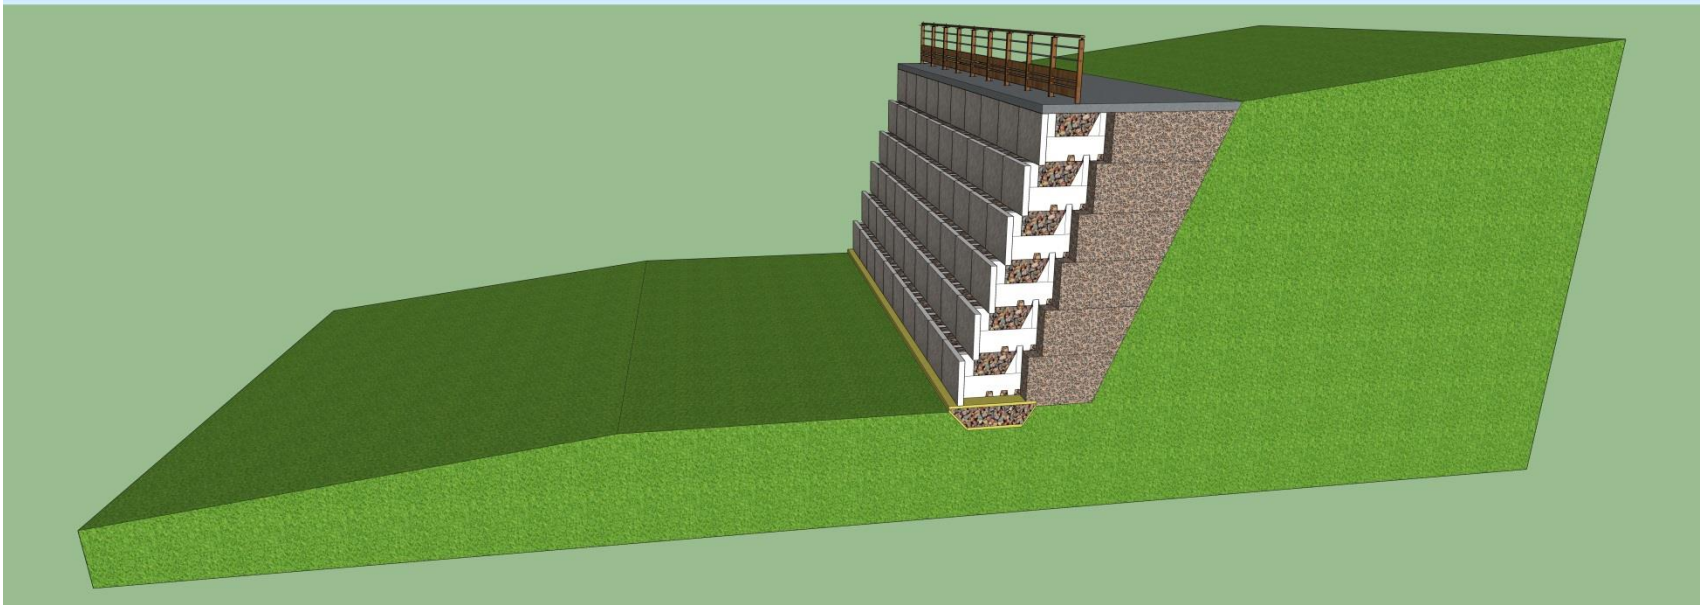

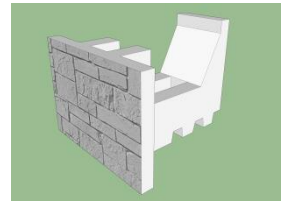

Les étapes du montage d'un mur

1) Maintien de Talus

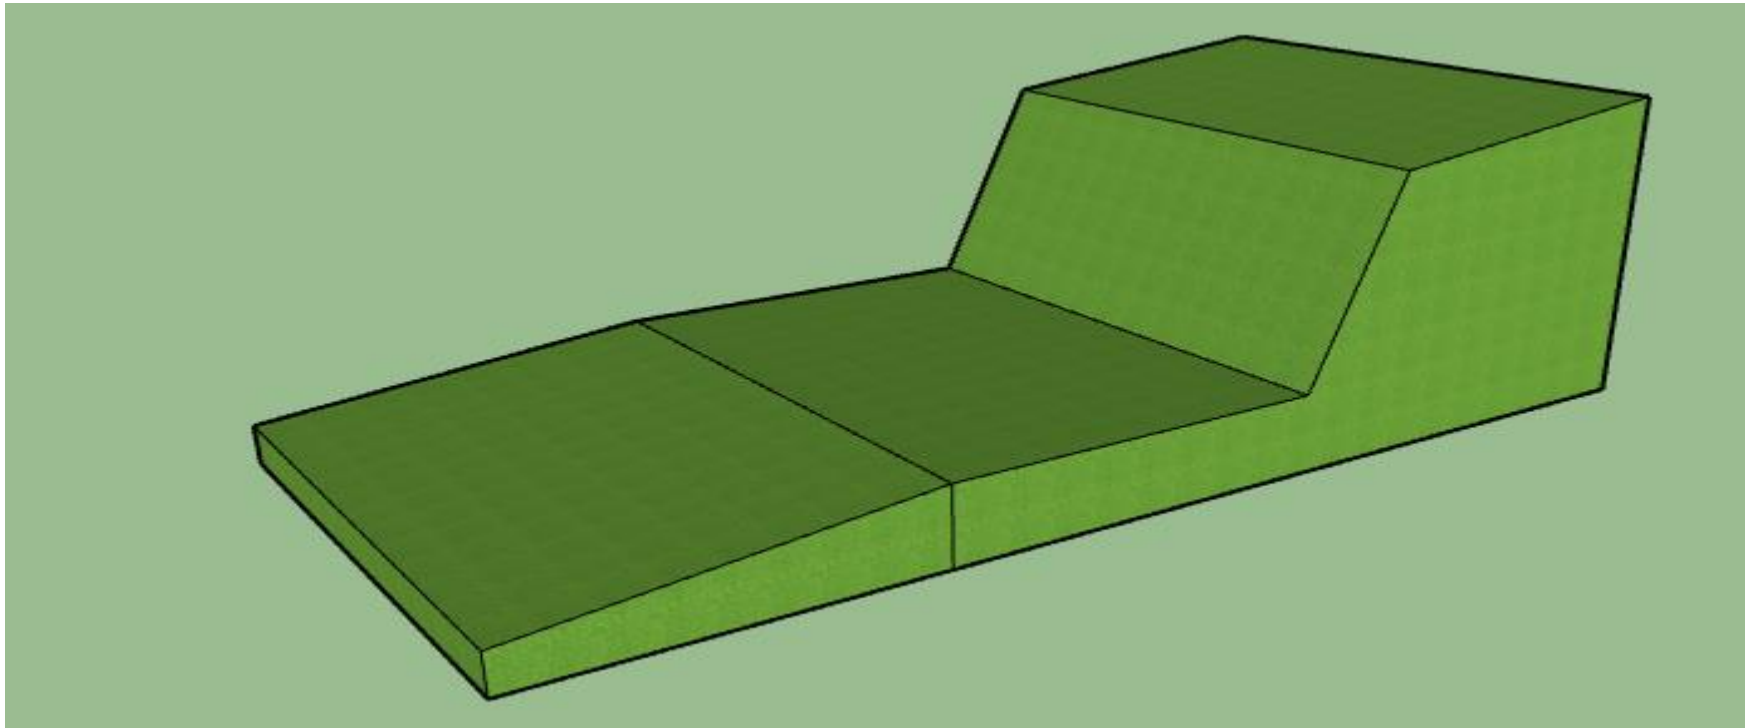

Etape n°5: Dalle et habillage de finition

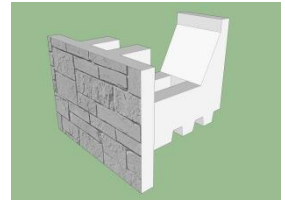

Les étapes du montage d'un mur

2) Elargissement de Talus

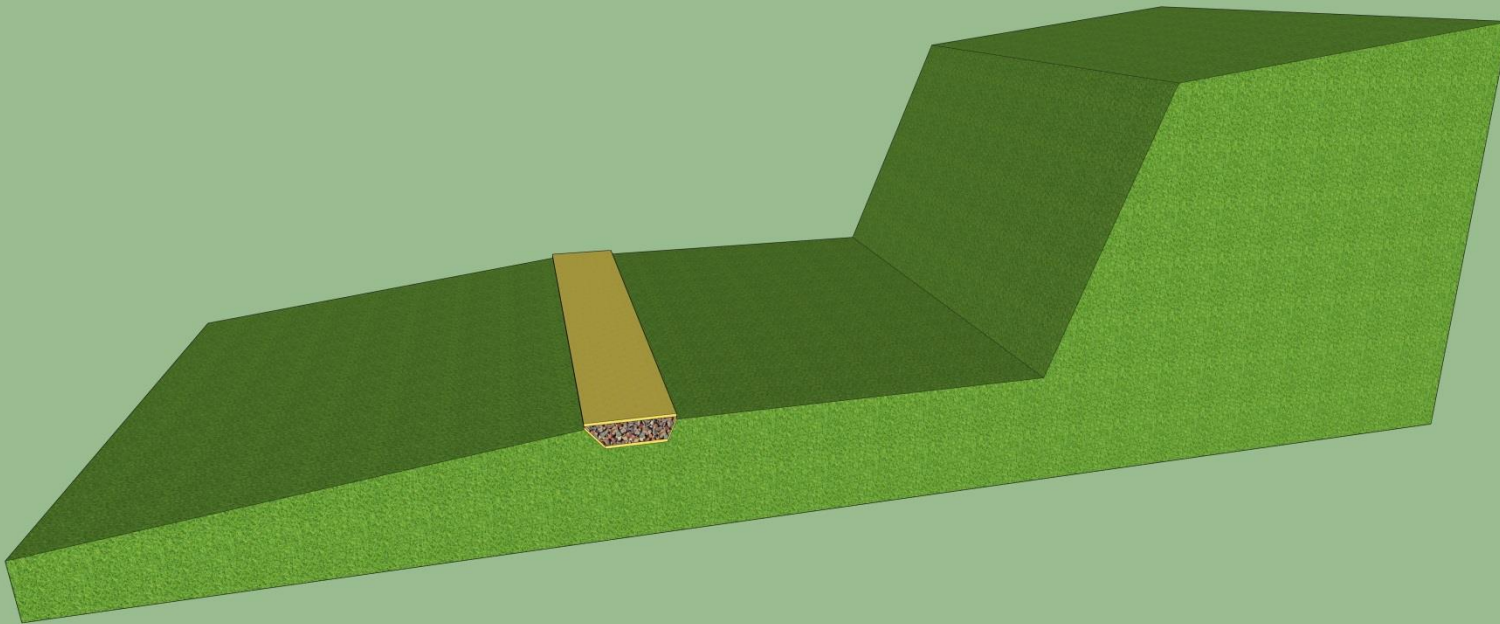

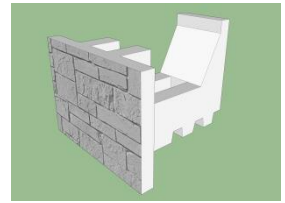

Les étapes du montage d'un mur

2) Elargissement de Talus

Etape n°1: Mise en place d'une assise

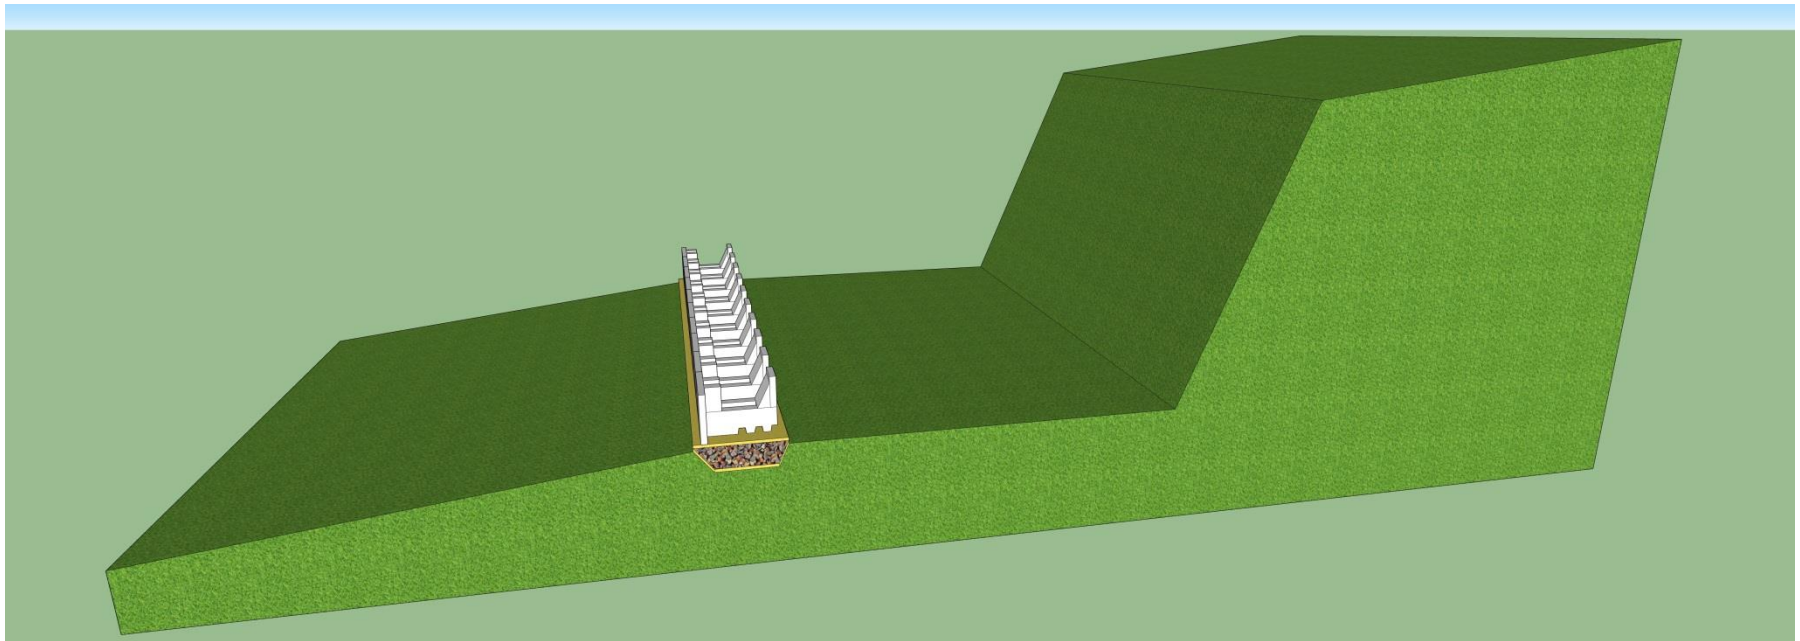

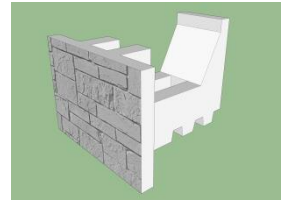

Les étapes du montage d'un mur

2) Elargissement de Talus

Etape n°2: Pose du premier rang

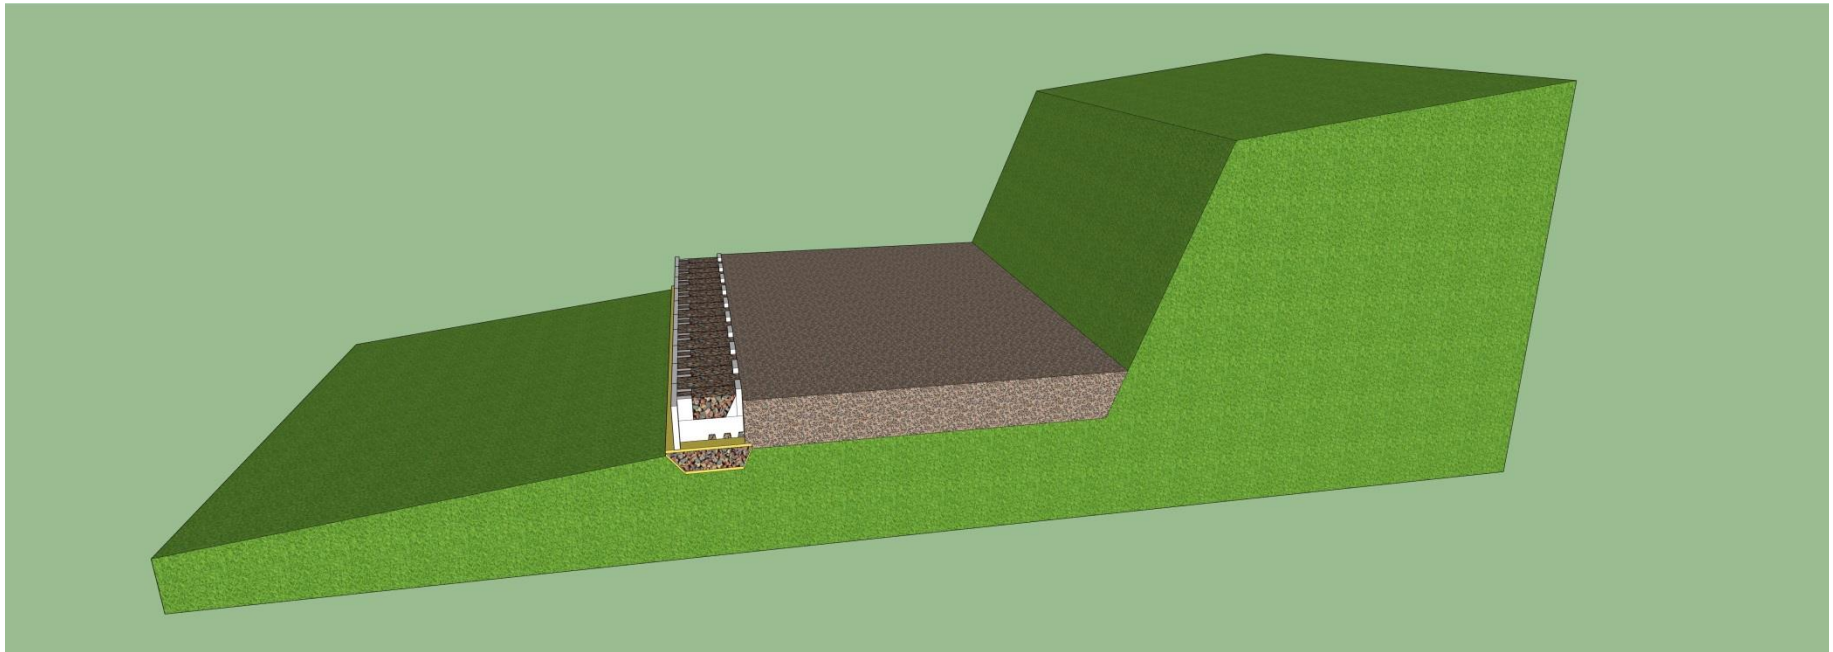

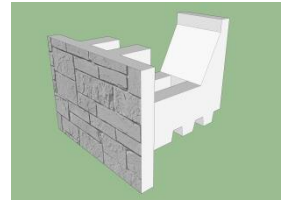

Les étapes du montage d'un mur

2) Elargissement de Talus

Etape n°3: Remplissage du premier rang

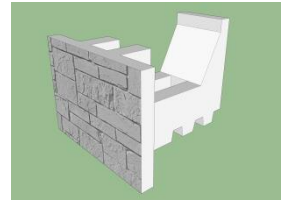

Les étapes du montage d'un mur

2) Elargissement de Talus

Etape n°4: Mise en place d'une nappe de géotextile entre chaque rang

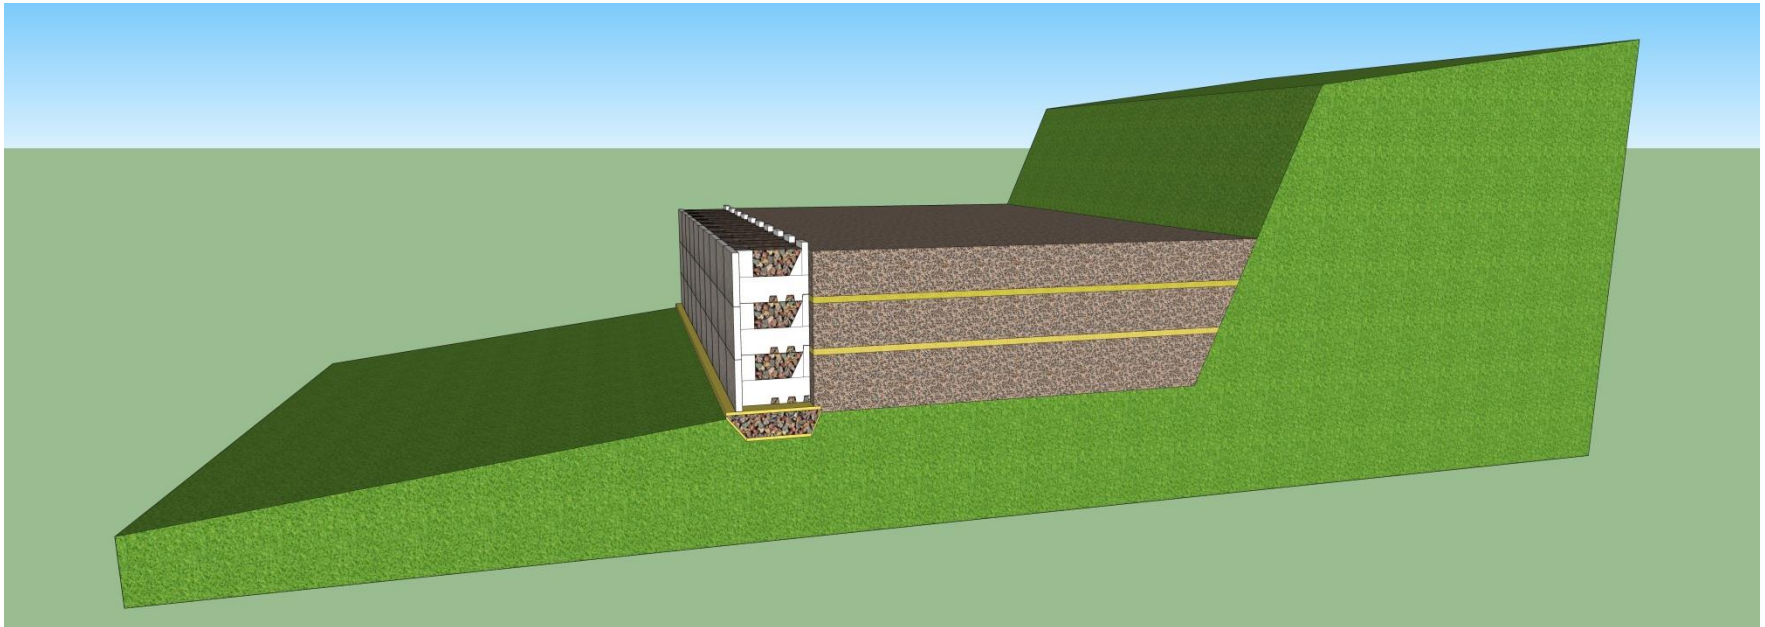

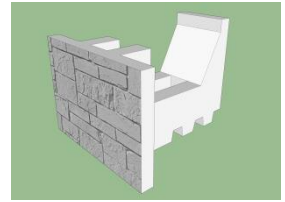

Les étapes du montage d'un mur

2) Elargissement de Talus

Etape n°5: Pose et remplissage des autres rangs de la même manière

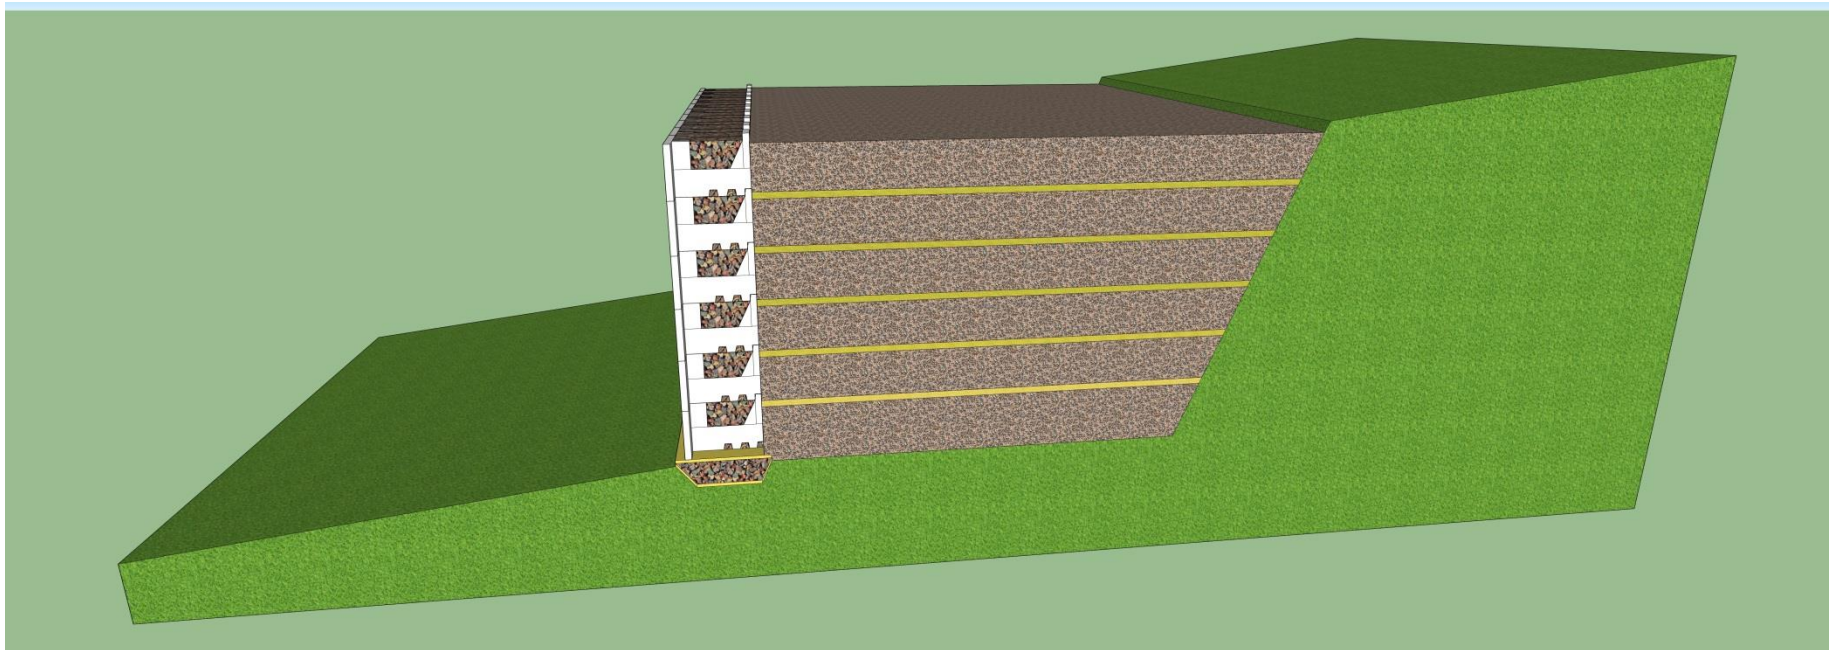

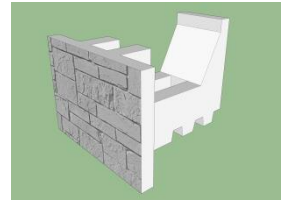

Les étapes du montage d'un mur

2) Elargissement de Talus

Etape n°5: Pose et remplissage des autres rangs de la même manière

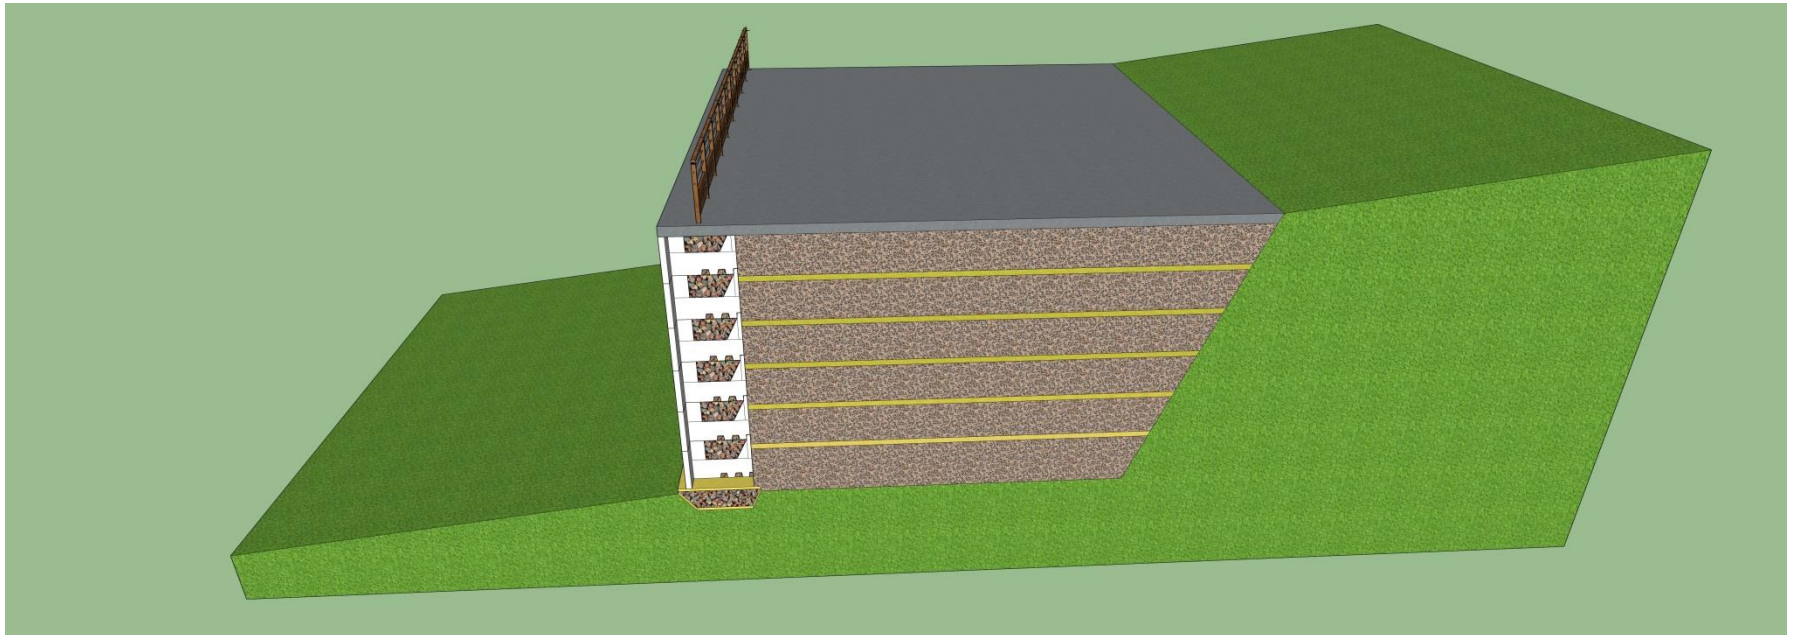

Les étapes du montage d'un mur

2) Elargissement de Talus

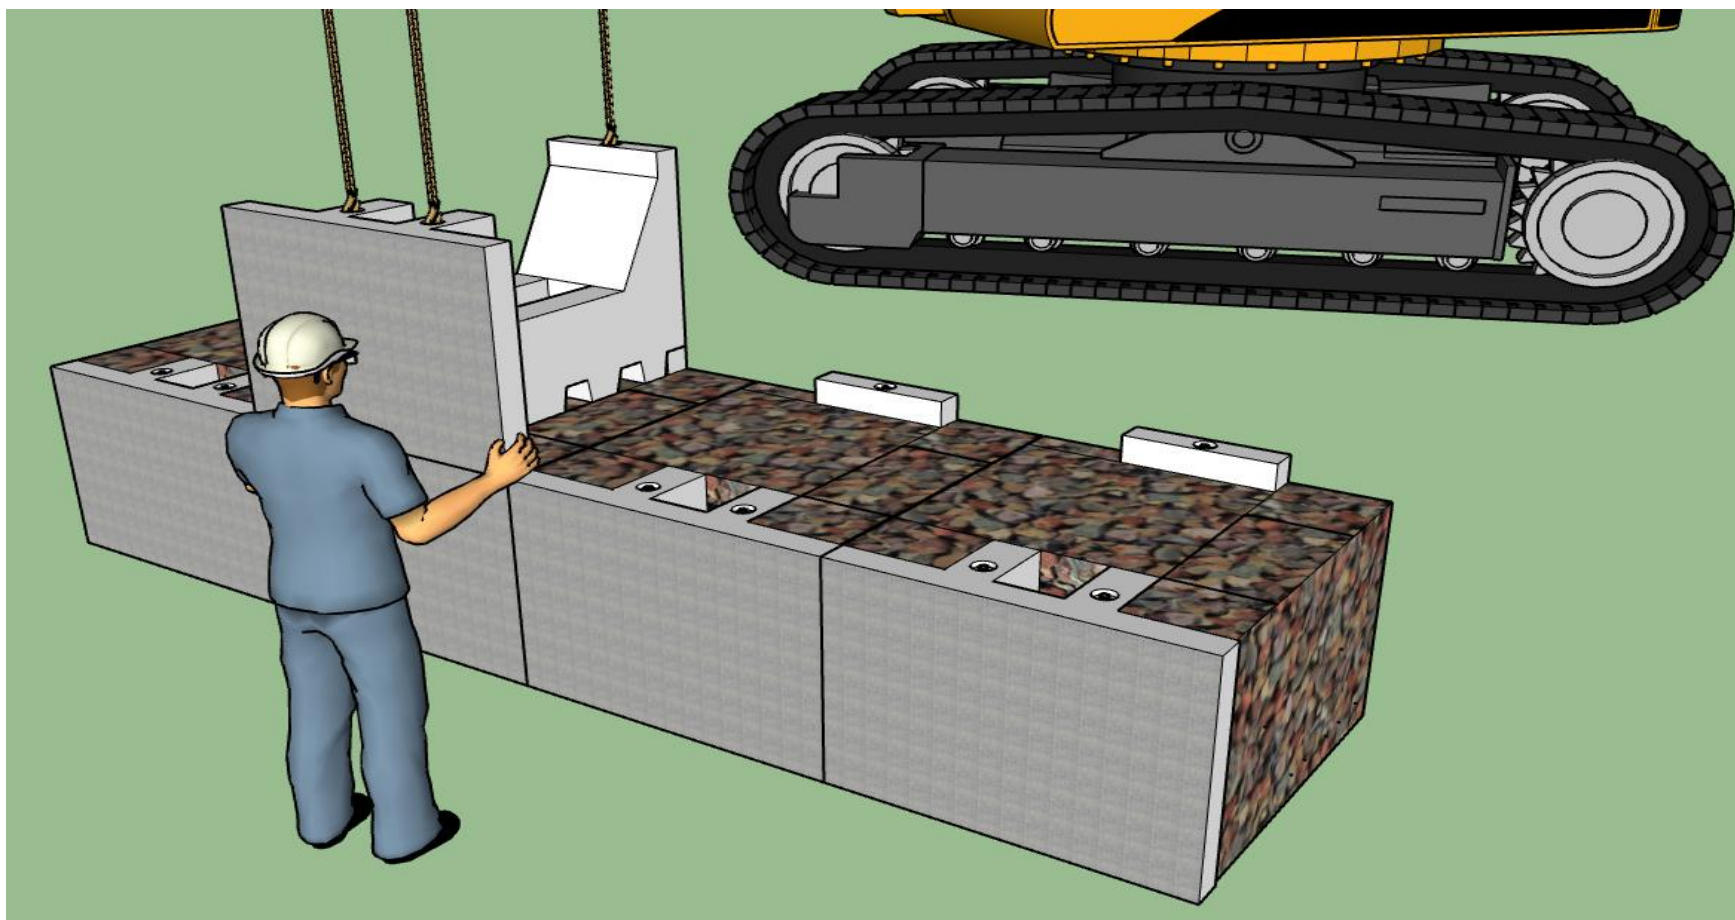

Etape n°6: Dalle et habillage de finition

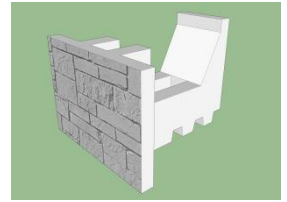

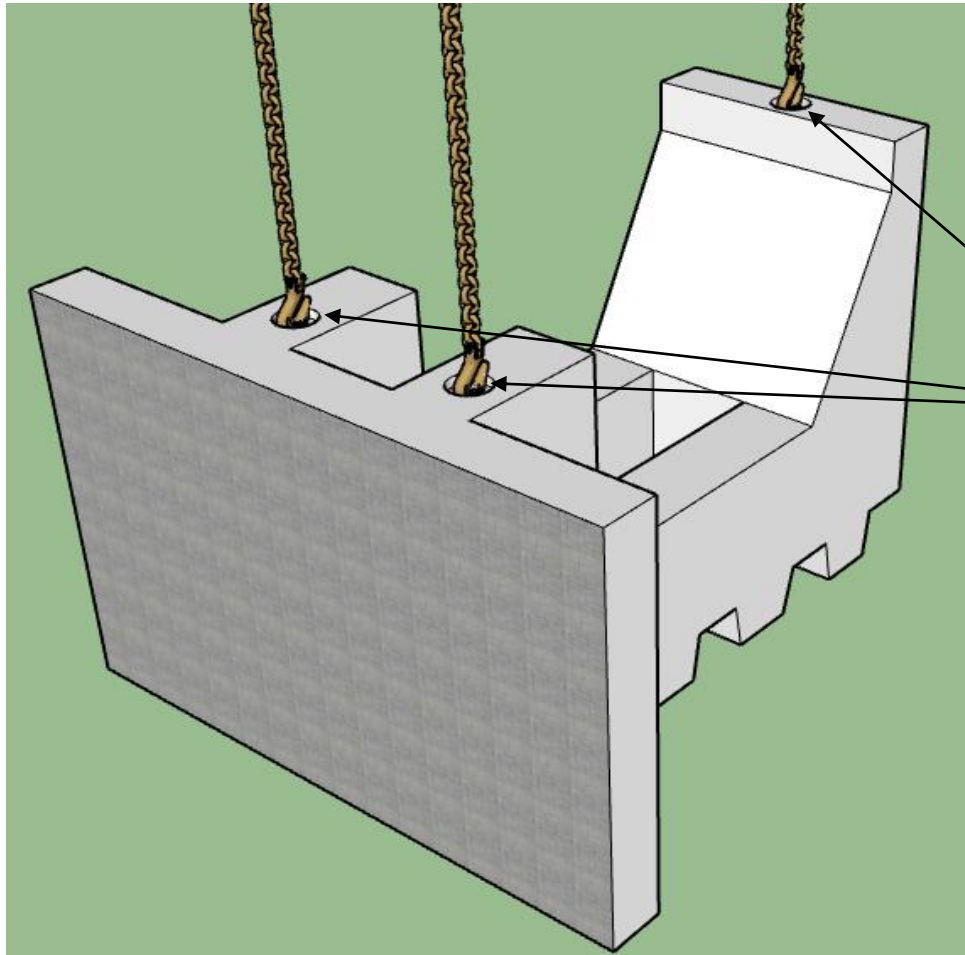

Mise en position du bloc

Levage par engin de chantier et mise en position par ouvrier

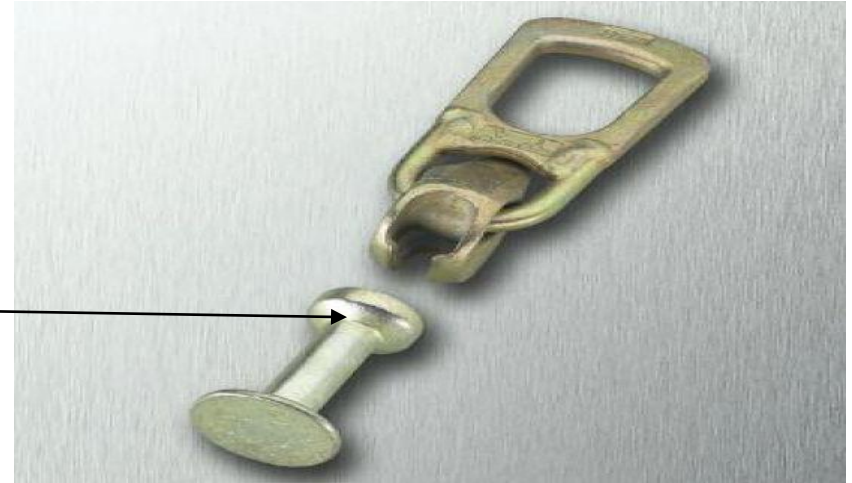

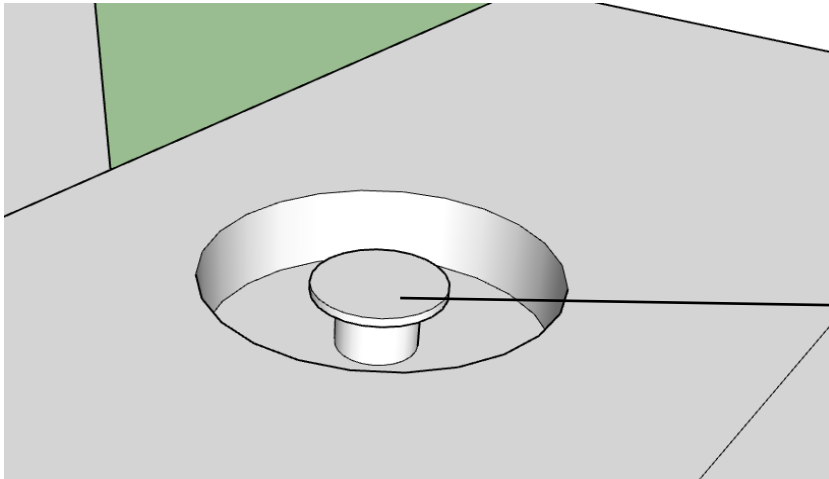

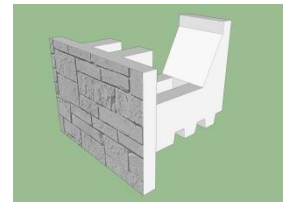

Mise en position du bloc

**Système de crochets
Arteon**
